

Lecithin Organogel

Product Highlights

Lecithin Organogel is a ready-made mixture of Lecithin and Isopropyl Palmitate. Together they are an absorption enhancer, emulsifier and a solvent. Lecithin Organogel is commonly used with Pluronic Gel 20% or 30% to form a PLO transdermal gel.

- Add to cream base as an absorption enhancer
- Use with Pluronic Gel to form PLO transdermal gel

Benefits

Absorption enhancer

Emulsifier

Solvent

Ingredients

Lecithin, Isopropyl Palmitate, Sorbic Acid

Specifications

Lecithin Organogel is an orange to brown opaque liquid.

- Specific Gravity: 0.97 g/cm³

Applications

Dermatology

HRT

Pain

Veterinary

Formulas

#3925 Diclofenac Sodium 10% - Cyclobenzaprine HCl 2% - Lidocaine 5% in PLO

#3043 Salicylic Acid 20% - Cimetidine 5% - Fluorouracil 5% in PLO

#2669 Testosterone 0.1% in PLO

#1087 Methimazole 5 mg/0.1mL I PLO
