

# Lipolayer Cream

## Product Highlights

Lipolayer Cream Base provides an elegant alternative to traditional PLO transdermal systems and enhanced transdermal delivery of a wide variety of compounding Active Pharmaceutical Ingredients (API). Lipolayer Cream Base offers superior emulsion stability and protection against ionic and high API loads. The smooth, creamy texture allows for easy application and leaves no tacky residue.

- Contains ingredients shown to enhance absorption
- Alternative to PLO transdermal system
- Stable at refrigerated and room temperatures

## Benefits

Transdermal penetration

Wide range of pH stability

No tacky residue

## Applications

Pain

HRT

Dermatology

Veterinary

Hospice

## Ingredients

Ozokerite, Alcohol Ethoxylate, Cetearyl Alcohol, Disodium EDTA, Ethanol, Isopropyl Palmitate, Ethylene Oxide, Fragrance, Glycerin, Dimethicone, Lecithin/Isopropyl Palmitate, Polysorbate 20, Pluronic F127 40%, Triclosan, Triethanolamine, Aloe Vera, Magnesium Aluminum Silicate, Allantoin, Panthenol (DL), Vitamin E Acetate, Phenonip, Titanium Dioxide, Mineral Oil
