

# Salt Durable Cream

## Product Highlights

A cosmetically elegant compounding base for transdermal compounded preparations that contain high percentages of active pharmaceutical ingredients or preparations with multiple active ingredients. Letco Medical's Salt Durable Cream has an improved feel over traditional PLO based delivery systems due to the silogel component. This time saving, ready to use base does not require pre-wetting of actives and no additional thickening agent is needed.

- Stable to a broad range of pH
- Stable to a broad range of salts

## Benefits

Holds high API load

Paraben-free

Fragrance-free
