

Topi-Pump[®]_X

ASSEMBLY AND FILL INSTRUCTIONS

TOPI-PUMPS ARE DESIGNED TO BE THE EASIEST-TO-USE PUMP IN THE PHARMACY INDUSTRY

STEP ONE.

Filling- Fill bottle with the formulation. Tap the bottom of the bottle to expel all air bubbles from the formulation. Ensure formulation is removed from the neck of the pouch

STEP TWO.

Assembly- Place the actuator into the opening of the pouch. Press down firmly with the palm of your hand until the actuator snaps into place.

NOTE: SLEEKLINE REQUIRES 2 DISTINCT SNAPS; BOTH LINES ON ACTUATOR WILL NOT BE VISIBLE.

STEP THREE.

Priming- Repeatedly depress actuator to expel all air. The first amount of formulation may be a partial dose, the next actuation will be a complete dose.

STEP FOUR.

Dispensing- For hands-free application, apply dose to wrist and rub wrists together until formulation is fully absorbed into skin.
