

Find innovation and excellence in the

Unguator[®] PRO

The newly designed Unguator PRO

The Unguator PRO Electronic Mortar and Pestle offers an advanced mixing technology in a closed system that optimizes your formulation mixes plus minimizes cross-contamination and waste.

The Unguator PRO model offers features such as:

Scalable Quality

- Automatic scaling of validated programs from one jar size to another, will support sizes up to **2000 ml***
- Enhanced performance for better time efficiency
- Consistent quality and top performance

Reproduceable Quality

- Production parameters can be traced easily according to ID-Numbers
- ID-Numbers enable consistent high-quality results
- Replaceable lift arm & quick-lock coupling

Quality Management

- Simplified documentation by integrated barcode scanner
- Quiet operation and highest standards consistently applied

**Requires the purchase of a separate lift arm for the 2000ml containers*
