Discover the magic of nature through play with Fenn & her Fairy Forest Friends.

Fairy Fenn lives in a magical tree trunk hideaway with her playful squirrel friends! She loves to plant seeds in her pretty roof top planter and would love for you to help her!

Watch as they grow into beautiful edible plants under the glow of the acorn lantern and have fun playing all sorts of games in and out of the tree trunk hideaway.

Grow and enjoy your Red Swiss Chard! ** Red Swiss Chard are tiny edible leaves that are typically harvested within 8-12 days of sowing. They have a sweet earthy flavour with a deep dark red colour. The leaves are packed with vitamins. Simply pick the leaves, give them a quick wash and enjoy!

Fairy Forest Garden

1. Remove the planter from the tree trunk.

2. Place the paper growing mat in the planter or carefully fill the planter with soil. To help your seeds grow soak them in water for 24 hours before planting.

> 3. Scatter the Rod Swigg Ch

Red Swiss Chard seeds evenly over the soil (you can add a thin layer of soil over the top) or just scatter onto the paper mat and carefully water the seeds.... but don't add too much water.

 * 4. Place the planter somewhere safe and light (perhaps a windowsill) until the Red Swiss Chard has grown – either on its own or inside the tree trunk.

> 5. You can connect the different Fairy Forest homes together using the fences in two different ways.

6. Collect the whole Fairy Forest Friends range and create a magical fairy forest village by connecting them together.

Fairies and animals love to come together to play and enjoy the magic of the forest and they would love for you to join them too!
