

Morvah Ceiling Hanging Planter Installation Instructions

1. Identify if there are any hidden pipes or electrical cables in the ceiling to avoid causing damage or risk of electrical shock during installation. Drill a pilot hole and screw the brass cup hook supplied into a beam or joist and place the loop of sash cord over the hook (A). **The joist must be capable of supporting the estimated planted weight of the Morvah Planter (15kg)**. If you require a longer drop we have supplied an extra length of sash cord which can be threaded through the top loop of the hanging cord already attached to your planter. Double up both ends of cord and then tie a figure eight knot connecting the two lengths of rope together in the same way as detailed above (B) and place it over the brass cup hook.

- Caring for the earthenware bowl

We have designed a striking pair of earthenware bowls for our Green Range featuring a hard-wearing glaze on the inside and a unique matte glaze on the outside, known as Engobe. We suggest you clean both the interior and exterior surface of the pot by gently wiping away any marks using warm soapy water and a lint free cloth. Once the pot is clean, gently dab dry using a soft, lint free cloth or towel. Any fibres on a cleaning cloth will stick to the outside surface more easily due to its beautiful finish.

- Caring for the wooden structure

Dust the Morvah planter with a soft, dry, lint free cloth. Mild furniture polishes can be used on the wood. The wooden strap should be dried immediately after watering or misting the plants whilst in place. This will help maintain the appearance of the wood by eliminating water stains. Simply wipe dry with a lint free cloth after watering.

- Caring for your plants

Always refer to the care guides and planting guidelines supplied with any plant or seed you've chosen. The Green Range earthenware pots do not have drainage holes in the base, therefore suitable drainage must be added. The bowls should be placed inside a rolled towel to stop them moving whilst planting.
