

FURNITURE MOUNT POWER AND CHARGING

Designed to fit into casegoods and furniture, PowerHub Mini simply and easily brings power and charging to all areas of the guest room or indoor public spaces. Built with safety in mind, PowerHub Mini is certified to the highest standards and includes tamper-resistant mains outlets. In addition mobile phone and tablets can be charged from the built-in USB Type A and Type-C™ sockets. PowerHub Mini is available in soft-touch black or white with a range of trims so designing guest-rooms and public spaces with easy to access power and charging has never been easier.

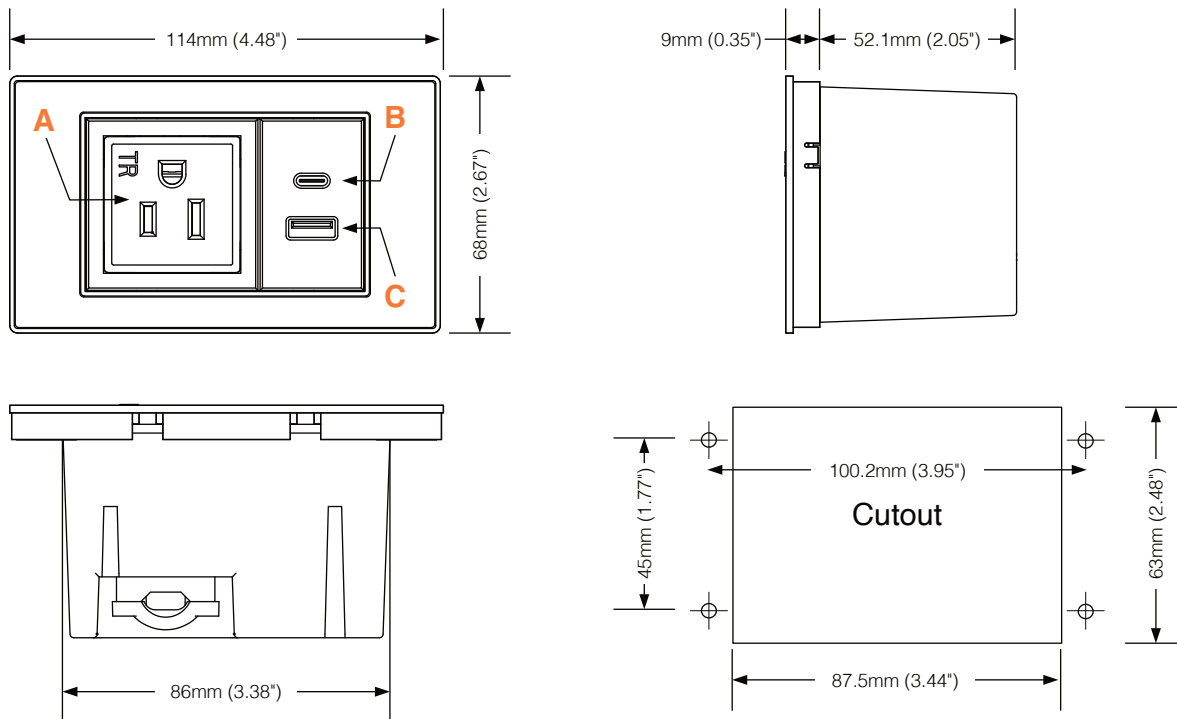

- Provide your guests with conveniently located power and charging capabilities.
- Compact design fits flush in furniture or casegoods (including bed headboards attached to the bed).
- Fully enclosed design with integral power cord and passthrough plug, simply plug in to a wall socket.
- Passthrough plug allows existing devices to share the same socket that PowerHub Mini is plugged in to.
- US 3-pin, 15 amp tamper-resistant AC outlet.
- USB Type-C™ charging outlet for charging the latest smartphones and tablets.
- USB Type A charging outlet for charging all other smartphones and tablets.
- USB over current/temperature/voltage/short circuit protection and cable length drop compensation.
- Two trim variants supplied with each unit; brushed grey metallic and soft touch (rubberised) black (or white).
- Other trim finishes available to order include nickel, stainless, champagne, brass and bronze.

PASSTHROUGH PLUG

PowerHub Mini is powered by simply plugging in to an existing power outlet, however this does not mean you lose use of that socket. By selecting a PowerHub Mini variant with a passthrough plug, simply unplug any existing device, plug in the PowerHub Mini and then re-plug the existing device to the rear socket of the plug.

FRONT OUTLETS

- A 125VAC, 15A tamper resistant outlet
- B USB Type-C™, 5V3A
- C USB Type A, 5V2.4A

POWER CORD

6.5ft (2M) power cord with moulded plug. Moulded plug is passthrough. A low-profile, non-passthrough version is also available if space is restricted.

CERTIFICATION

- UL 962A US and Canada (ETL).
- UL 498
- UL 1310
- FCC Part 15b
