

CHOOSE YOUR FIREPLACE

HOW?

1. Calculate the **square meters** of your room (length x width).
2. Choose the 'area coverage' bracket of your room on the **left axis**.
3. Choose which 'style' will suit your home on the **bottom axis**.
4. Find the possibilities **specific to your needs**.

*Factors like wall isolation, windows and open doors can hinder the efficiency and area coverage of your fireplace.
