BOL-HSS-A-SS

SPECS

This model is made with 201 stainless steel and is fueled by liquid propane. Designed to hold a standard 20 lb tank which provides stability at the base and keeps spaces warm for up to 10 hours straight on high setting. This heater is easy to assemble and includes attached wheels making it completely portable. Ignition for this model is a Piezo electric system and includes a 5' PVC gas hose and standard regulator. At over 7' tall this heater stands high enough to prevent human contact and burns from the attached radiator grid and includes an anti-tilt safety device. This heater is CSA Certified and has been deemed safe for use through rigorous safety standards testing.

Intended for outdoor use. Additional safety precautions should be taken to ensure there are no hazardous or combustible materials nearby and there is good airflow in the area it is placed. Prior to selecting your heater ensure you are informed of the safety protocols and regulations in your area.

This specification sheet was created to provide information about model BOL-HSS-A-SS. The purpose of this sheet is to provide an overview of the specifications and features of this model.
