

## PullThrough Pro Data

The easiest way to allow guests to connect securely to a data network.

### PullThrough Pro Data

- Convenient and secure presentation of guest facing RJ45 Ethernet data cable.
- Sleek, stylish design for any hotel guest room.
- Brushed Aluminum/Black or Black.
- Optional hotel branding on cap<sup>1</sup>.
- Simple, secure installation.
- Supplied with Ethernet cable.

PullThrough Pro Data provides guests with convenient access to a secure wired network connection via an RJ45 Ethernet cable.

Its compact, weighted design keeps the cable easily accessible and helps prevent guests from accessing network connections behind furniture or equipment.

### DeskCard Compatible

Compatible with DeskCard<sup>2</sup> for guest instructions or marketing collateral.

### Colour and Branding

Choose brushed aluminum with a black cap or all black. The cap can also be customized with your hotel branding.

### Simple Installation

Place the cable in the PullThrough Pro base and lock the cap in place. Connect the Ethernet cable suitable RJ45 outlet. The supplied double-sided adhesive pad can be used to secure the unit to furniture.

<sup>1</sup> Subject to MOQ.

<sup>2</sup> DeskCard and insert must be ordered separately.
