

## MiniClip Desktop TA-MCDTH

Mount MiniClip modules  
on a nightstand or desk.

### The Flexibility of MiniClips on Your Desk or Nightstand

The Mini-Clip Desktop Housing brings the flexibility of the Mini-Clip range to the guest room desk or nightstand. A subtle brushed metal finish complements the Mini-Clip modules perfectly and can house up to four 25 mm modules or two 25mm modules and a 50mm module.

First choose up to 4 modules from the MiniClip range shown below (Dual USB 50mm counts as 2 modules). Then clip the chosen modules into the front of the Mini-Clip Desktop Housing in the order you require. Attach the cables and finally secure the rear cover. It couldn't be simpler!

The MiniClip Desktop Housing can be left free standing or attached to the desk or nightstand using either screws or a lanyard.

Dual USB-C

Dual USB-A

Dual USB-A High Power

Light Switch

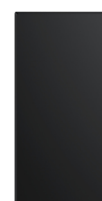

HDMI

3.5mm Audio

CAT6
