Mini-Clip DTH I TA-MCDTHBK01
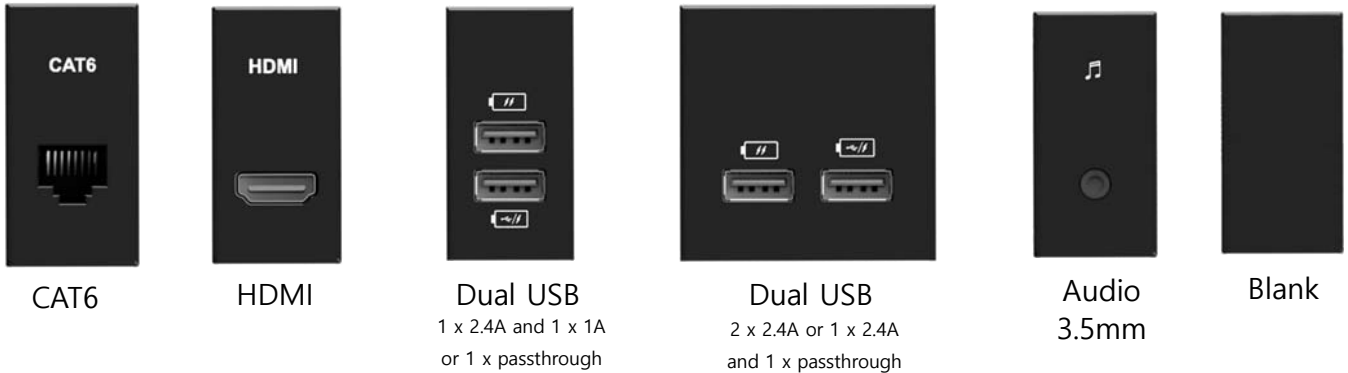

teleadapt

SPECIFICATION

THE FLEXIBILITY OF MINI-CLIPS ON YOUR DESK OR NIGHTSTAND

The Mini-Clip Desktop Housing brings the flexibility of the Mini-Clip range to the guest room desk or nightstand. A subtle brushed metal finish complements the Mini-Clip modules perfectly and can house up to four 25mm modules or two 25mm modules and a 50mm module.

MiniClip DeskTop Housing with an example module configuration.

First choose up to 4 modules from the MiniClip range shown below (Dual USB 50mm counts as 2 modules).

| CAT6 | HDMI | Dual USB
1 x 2.4A and 1 x 1A
or 1 x passthrough | Dual USB
2 x 2.4A or 1 x 2.4A
and 1 x passthrough | Audio
3.5mm | Blank |

Then clip the chosen modules into the front of the Mini-Clip Desktop Housing in the order you require. Attach the cables and finally secure the rear cover. It couldn't be simpler!

The MiniClip Desktop Housing can be left free standing or attached to the desk or nightstand using either screws, adhesive pad or lanyard.
