

How to build The Shorty to the left

Mustard lockers are beautifully designed to make putting them together simple + argument free! No tears + no allen keys! All you need to get started is a **phillips head screwdriver!**

We've made a video taking you through the build step by step. Watch it here: mustardmade.com/build-it. It's easy, you got this!

We recommend you attach the locker to the wall to prevent tipping + causing injury. Use the extra screws + plugs to screw through the two holes in the back panel (as required for your wall).

1

Stand both legs up + push the side panel down onto the legs.

TIP: make sure the holes in the legs are nearest to the front!

2

Push the second side panel down onto the legs.

3

Push the back panel into place, starting at the bottom.

4

Fold down the tabs on the corners of the back panel.

5

Add the base, starting at the front. Push the base down into place.

6

Add the top panel starting at the front.

7

Check from all angles that the side + back panels are slotted in correctly.

Click the top into place.

8

Add the brackets + place the shelves on top. Use the round holes to help you measure the height.

9

Insert the post + large washer in the hole in the leg.

10

Slide the door down onto the post.

At the top of the door, insert the L shape post up into position through the holes. Bend the tab up.

11

Grab your screwdriver!

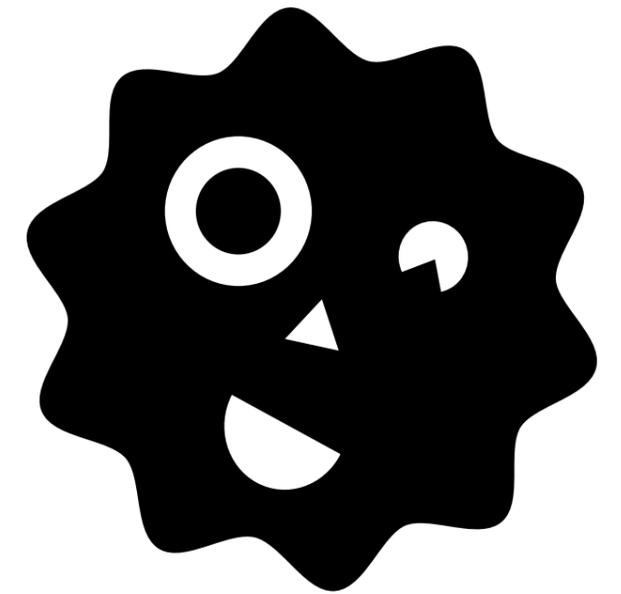

Use your screwdriver to attach the handle with the small screws + small washers.

12

Woohoo! You nailed it! Now the only question is... what will you put inside?

P.S. pop the spare key in a safe spot just in case!

**you got
this!**
