CHEE CHAIR

Chee is an ornate but contemporary bent wire chair collection designed for comfort. The overlapping metal wires curve out from the frame to create a striking geometric web. This bent wire web supports the back and forms a seat that is both beautifully graphic and supremely comfortable.

Suitable for indoor and outdoor use, the Chee chair is durable and stackable up to 4 making it suitable for both commercial interiors and the home.

Each design in SP01's outdoor collection has undergone rigorous testing to ensure longevity even in the harshest of environments - the Australian outdoors.

DESIGNER

Tom Fereday, 2016

MATERIALS

A bent steel rod and wire chair treated with three layers of protection: zinc primer, cathoretic dip and powder coat.

Every chair comes with a seat pad specially treated for outdoor use.

Chair available in white or black with seat pad in matching colour:
Santorini black 13D0001
Santorini cream 13L0002

Optional upholstered soft seat cushion CHCUSC available in outdoor fabrics and indoor fabrics and leathers.
