DINING TABLE

SMITH TABLE

SMITH DINING TABLE

Smith is long and lean, with a beautifully shaped timber frame. The table's apparent simplicity conceals complex internal engineering which includes a supporting steel sub-frame.

The table is versatile due to the top which sits lightly on the frame, enabling the use of glass or timber, with a subtle shadow line detail separating the two elements.

MATERIALS

Frame is made of solid ash available in natural, carbon stained or walnut stained ash.

Tabletop available in matching timber veneer, acid-etched white or grey glass or ceramic in Diamond Cream or Nero Greco

The table is designed for disassembly, so all elements fold down for efficient shipping.

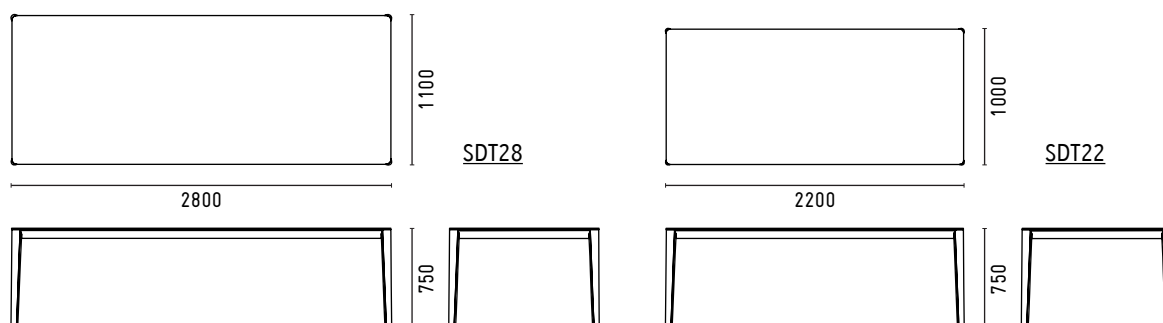

DESIGNER

Metrica, 2015

CERTIFICATION

FSC certified timbers
