READ AND SAVE THESE INSTRUCTIONS

Safety Information

Please read and follow all instructions and safety guidelines in this manual.

Medical

- This scale should not be used to diagnose or treat any medical condition.
- Scale data should not be used as a substitute for medical advice from a healthcare professional.
- This scale uses a harmless electrical current to measure body fat. Consult a healthcare professional before using the smart scale if you use medical electronic equipment such as a pacemaker.

General Use

- Check the scale before using. **Do not** use the scale if it is damaged in any way.
- **Do not** strike or bang on the scale and **do not** use the scale if there is a crack on the glass. While tempered glass is stronger

and fractures more safely than ordinary glass, it may shatter unexpectedly after developing a slight crack. If you see a crack, contact **Customer Support** (see page 24). The glass platform is slippery when wet. **Always** make sure the platform and your feet are dry before stepping on for measurement.

- Place the scale on a hard, flat surface to avoid tipping.
- To weigh safely and accurately, stand with your feet shoulder-width apart while on the scale. **Do not** stand on the edge of the scale or jump on the scale.
- Avoid standing on the scale for a long period of time, or when not measuring yourself.
- **Do not** overload the scale. Maximum weight capacity is 400 lb / 180 kg / 28 st.
- Keep the scale in a cool area with low humidity. Keep the scale away from heat sources, such as ovens or heaters. Avoid temperature fluctuations. Store the scale in a horizontal position, not a vertical position.
- Handle with care. Not for commercial use. Household use **only**.

Batteries

- **Do not** mix new and old batteries.
- If the scale is not in use for a long period of time, remove the batteries to extend the lifetime of the scale.

Before First Use

1. Open the battery compartment on the underside of the scale. Remove the included AAA batteries.
2. Remove the plastic insulator strip from the battery compartment.
3. Replace the batteries. Follow the guidelines in the battery compartment to match the + and - terminals.

VeSync App Setup

Note: Due to app updates and improvements, the VeSync app may be slightly different than shown in the manual. In case of any differences, follow the in-app instructions.

1. To download the VeSync app, scan the QR code or search “VeSync” in the Apple App Store® or Google Play Store.

Note:

- For Android™ users, you may need to select **Allow** to use VeSync.

2. Open the VeSync app. If you already have an account, tap **Log In**. To create a new account, tap **Sign Up**.

Note: You must create your own VeSync account to use third-party services and products. These will not work with a guest account. With a VeSync account, you can also allow your family and friends to use your smart fitness scale.

3. Make sure your phone has Bluetooth® turned on.
4. Tap + in the VeSync app and select your smart fitness scale.
5. Follow the in-app instructions to connect to your smart fitness scale.

Note: *You can change the name and icon at any time in the smart fitness scale settings.*

Creating a User

If you are a new user, you will need to enter physical information before weighing yourself for the first time so the scale can calculate your body metrics. Follow the in-app instructions to create a user profile.

Note:

- *Entering inaccurate information will make the scale's measurements less accurate.*
- *If you don't identify with the available gender options, or are unsure, pick the option that you think best physically matches you. This choice is used for physical measurements, such as body fat percentages.*
- *Children under 3 years of age cannot measure body metrics other than weight.*
- *Minors will need a guardian's consent to create a VeSync account.*

Using the Smart Scale

Note:

- *To switch between pounds (lb), kilograms (kg), and stone (st), open the VeSync app and select the weight unit in the Device Settings menu. To see measurements besides weight, you must connect the scale to the VeSync app (see page 11).*
- *Turning on Zero-Current Mode in the VeSync app will turn off the scale's electrical current and will only provide measurements for weight and BMI. This mode can be helpful for users who are pregnant or who have implanted medical devices, such as pacemakers.*
- *To measure your baby or pet, turn on Baby Mode and follow the in-app instructions for weighing. Baby Mode will not measure other body metrics and will only measure weight and BMI.*

1. Place the scale on a hard, flat surface.

Note:

- *Placing on soft surfaces such as shaggy carpet may cause inaccurate measurements or tipping.*
- *The scale can be used on low-pile carpet with a fiber length 0.4 inches / 10 mm or less.*

2. Step on the scale, then step off. Wait for the LED screen to display "0.0" before using.
3. Place dry, bare feet on the scale's conductive areas. Stand on the scale until the display flashes several times, showing your final measurement. If your smart scale is connected to the VeSync app, additional results (such as BMI, body fat, etc.) will show in the app.

Maintenance

Clearing the Smart Scale

If the scale has been moved or flipped upside down, it must be cleared to ensure accurate results.

1. Place the scale on a hard, flat surface.
2. Step on the scale until digits appear on the display, then step off. [\[Figure 2.1\]](#)
3. The scale will show “**0.00**” when cleared. [\[Figure 2.2\]](#)

[\[Figure 1.1\]](#)

[\[Figure 1.2\]](#)

Cleaning the Smart Scale

- Use a slightly damp cloth to clean the surface of the scale, followed by a soft, dry cloth to wipe away any remaining moisture.
- **Do not** use chemical or abrasive cleaning agents to clean the scale.

Replacing the Batteries

The display will show “**Lo**” when the batteries need to be replaced.

1. Open the battery compartment on the underside of the scale.
2. Remove the old batteries and dispose of them properly.
3. Install 3 new 1.5V AAA batteries, making sure they are placed under the correct polarity.
4. Replace the battery compartment cover.

Note: *The scale may need to be cleared after replacing the batteries.*

Turning On

Troubleshooting

The scale doesn't turn on.

- Check if the batteries are properly installed. If using the scale for the first time, remove the plastic insulator strip from the battery compartment.

Information flashes on the display and then disappears.

- The batteries are low and may need to be replaced.

The smart scale doesn't connect with the VeSync app.

- Make sure your phone's operating system is running on iOS[®] 10.0+ or Android 5.0+.
- Close and relaunch the VeSync app. Make sure you're using the latest version.
- Make sure your phone has Bluetooth turned on. For Android users, make sure your Location is turned on as well.
- Make sure your scale and phone are within 30 ft / 10 m of each other.
- Make sure the scale is not currently connected to any other phone or app.
- Try turning off any VPN apps.

The scale readings seem unstable or inaccurate.

- Make sure the scale is on a hard, flat surface.
- Reset the scale to zero (see page 14).

My scale will only measure my weight, not my other metrics.

- Set up your smart scale in the VeSync app. Your weight will show on the scale display, and your weight, and more results will show on the app.
- If you're wearing shoes or socks, the scale cannot measure health metrics such as body fat. Step on the scale with bare feet. [\[Figure 2.1\]](#)
- Make sure to place your feet on the scale's conductive areas. [\[Figure 2.2\]](#)
- Make sure Bluetooth is turned on.
- Check if Zero-Current Mode is on. If it is, the smart fitness scale will provide measurements for only weight and BMI, not other metrics.

Note: If the scale has errors on the display, will not turn off automatically, or has a problem not listed here, try removing the batteries for 3 seconds, then replacing them. If the problem is not resolved, replace the batteries with new ones.
