

# ARCS SHADES

DESIGN BY MULLER VAN SEVEREN

HAY

## ARCS

Created for HAY by Belgian duo Muller Van Severen, Arcs reflects the designers' love of showcasing materials by focusing on simple, elemental shapes and the intensity of colour in an object. Arcs is a series of lighting designs formed from a continuous chain of curved arches that form a single element, using spatial volume to create a scalloped silhouette. Arcs is made from steel and comes in a choice of vibrant colours or with a mirror surface that reflects and magnifies the natural light. The different variants and mounting solutions give Arcs a versatile quality that makes it easy to integrate in most interior spaces.

Muller Van Severen was founded in 2011 by Belgian artist duo Fien Muller and Hannes Van Severen. The couple has always been on an inspired quest for sculpturally interesting furniture objects, and their work sits somewhere between design and art, drawing on their passion for architecture and materials. They have won countless awards and collaborated with prestigious international museums and galleries.

Formed from a continuous chain of curved arches that form a single element, the Arcs Shade creates a spatial volume that plays with light and shape.

For HAY, Muller Van Severen has designed the Arcs Lamp Shades, Arcs Vases, Arcs Candleholders and Two-Colour Tables.

A shared love of colour and materials is often the inspiration behind many of Muller Van Severen's designs. The designer duo is constantly seeking new ways to present the natural beauty of the materials they use, striving to give the materials their own distinct presence.

Arcs is crafted in steel and is available in several different colours or with a mirror finish.

Muller Van Severen's home in Evergem / Belgium.

The shade can be used as a table lamp or pendant lamp, both options forming contrasts in depth, colour and shape.

The Arcs Wall lamp provides a soft, ambient up and down light that plays with shapes and shadows.
