

June

June is a sophisticated pale tone khaki rug, featuring a textural geometric pattern created by loop and cut pile rug knotting techniques. The patterning is given depth and intrigue by the varied level pile heights. June is made by hand knotting, ensuring a luxurious, dense, hard wearing and soft rug. The texture and uneven layers of the rug will hide dirt and food traffic well.

Product Details

Pile Composition 100% New Zealand wool
Warp/Base Composition 100% cotton
Manufacture Details Hand knotted - Tibetan knot, cut pile + loop pile
Country of Origin India
Pile Height Approximately 6mm, 8mm, 10mm cut pile + 6mm loop pile
Custom Production Lead-time 16 - 20 weeks + local freight lead time
Suitability Indoor, residential & light commercial
Size 200 x 300cm, 250 x 350cm, 300 x 400cm, custom + custom round
 79 x 118", 98 x 138", 118 x 157", custom + custom round

Available Colours

Pale Khaki

Care Instructions

Spot Cleaning

Treat any liquid spills immediately. Place a clean cloth or unprinted paper towel directly on the liquid to absorb the spill. Following this use a clean cloth, dampened with water and dab the affected area, do not follow a circular motion, simply dab and blot. Absorb any excess moisture after cleaning with a clean dry cloth or towel. For dirt marks, such as soil, simply allow the soil to dry and vacuum. If spills or marks remain, contact a professional rug cleaning specialist.

Professional Cleaning

After time your rug will require professional cleaning. Any persistent or large stains will also require professional cleaning. Do NOT dry clean or steam clean rugs. Each Jordan rug is unique, and made of different fibres, we recommend contacting a professional rug cleaner who specialises in hand made rugs or contact Jordan for a recommended specialist cleaner.

Shedding & Lose Fibres

All rugs may shed and have loose fibres. Shedding will take place mostly in the 1-6 months of the rugs lifetime, but will slow over time. High traffic areas may always have a small amount of shedding. Simply vacuum any shedding fibres. For loose threads or ends - do not pull, simply clip them carefully with fabric scissors.

Care & Maintenance

The positioning of your rug will have an effect on the longevity and appearance of your rug over time. Avoid direct and continuous exposure to sunlight. Vacuum regularly to prevent dust and crumbs from settling into the pile. Rotate rug occasionally to equalize wear.
