1

1. Unpack the three (3) modular hose sections.
2. Carefully review instructions prior to assembly.

***** This product can be assembled and connected to achieve various lengths (7-21ft). Note that the modular section with the vent hole (section E) must ALWAYS be used. IMPORTANT: For optimal performance, use the shortest**

SAFETY WARNING: COVERING THE VENT HOLE CAN CAUSE BACK PRESSURE WHICH MAY DAMAGE THE INFLATOR, DOING THIS WILL CAUSE THE INFLATOR TO SHUT DOWN PREMATURLEY FROM OVERHEATING.

2

1. Determine the total length needed; 7ft (E only), 14ft (B or D + E) or 21ft (B+D+E) as shown in **DRAWING 1**.

3

1. Attach modular hoses at connection points (C).
2. Connect hose to inflator (A).
3. Make sure the vent hole (F) is always clear of any obstructions.
4. Attach the end of the modular hose (G) into the halkey-roberts valve located on product and begin inflation.

Note: Hose will be 21-24' when fully stretched.
