# Pull-Through Classic | TA-6300

## SPECIFICATION

The Pull-Through Classic keeps any CAT5 cable in place, providing a straight forward solution to cable management issues. This visually attractive product offers a low-cost solution to in-room HSIA Ethernet cable placement. The Pull-Through Access Point has a unique clam shell design that allows the CAT5 cable to slide easily while keeping it in place. The unit can be opened with a regular Phillips tip screwdriver when CAT5 cable replacement is necessary by a technician.

- Creates a recognizable access point for guest HSIA.

- Advertises your HSIA in-room presence.

- Logo and DeskCardTM offer branding opportunities.

- Solves guestroom cable management issues.

- Adhesive double-stick foam base plate for security.

- Weighted to stay in place during use.

- Rubber feet for desk surface protection.
