<b>Appropriate Engineering Controls</b>	Provide local exhaust or general room ventilation. Avoid all unnecessary exposure. Do not eat, drink or smoke during use. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work.
<b>PPE - Eye/Face Protection</b>	Chemical goggles or safety glasses
<b>PPE - Skin Protection</b>	Wear suitable gloves resistant to chemical penetration. Chemical-resistant gloves (according to European standard NF EN 374 or equivalent). Choosing the proper glove is a decision that depends not only on the type of material, but also on other quality features, which differ for each manufacturer. Since the product consists of several substances, it is not possible to estimate the durability of the glove material beforehand. Thus it needs to be tested before use. The exact breakthrough time has to be found out by the manufacturer of the protective gloves and has to be observed.
