

GLU JET –  
ZERO JOINT WITH THIN FILM TECHNOLOGY

With Glu Jet, you can process commercially available glue cartridges or glue granules - depending on your needs in an unrivaled quality with zero joints. Comes standard with EVA or waterproof PUR adhesive.

Thanks to the 90-degree squeegee division in a 1 mm grid, 19 strips of adhesive are applied with high precision to a 19 mm board, for example. During the subsequent pressing under high pressure, the adhesive can be distributed within the narrow surface from the mountain to the valley - without spilling out at the top and bottom - and thus creates a clean, optically invisible joint. At the same time, this patented process ensures a high-strength connection.

Wafer-thin glued joints can be realized with the HOLZ-HER Glu Jet system without any problems and with unrivaled flexibility.

- ✓ Top quality
- ✓ Zero joint as standard
- ✓ High-strength adhesive bond
- ✓ Waterproof quality with PUR
- ✓ High heat resistance
- ✓ Easy cleaning

	STREAMER 1054 C	STREAMER 1057 XL C
steering	Industrial PC with 15.6" touch screen	
Store	For rolls and strips with single feed	
Put	Strip magazine for edge separation	
glue application	Dia-mill, 45mm	
	Dia milling cutter, 60mm	
glue application	Glu Jet with thin film technology	
	Granulate and/or cartridge slot	
printing unit	Automatic reload function	
	3 pinch rollers, first driven, pneumatic and application controlled	
Hoods	Two-motor 60mm, pneumatically tiltable	
milling	Multifunction, flush 8 mm/ R2 mm	
	Pneumatic package	
corner copying	x	Single engine 60mm
	x	shelf range
Radiusziehklinge	Mechanical incl. chip collector	
	Pneumatic package	
surface scraper	Deployment-controlled including blowing nozzles	
	With pre- and night-time sampling	
Schwabbeln	buffing unit	buffing unit
spray device	Lubricant horizontal	Lubricant horizontal
		Release agent and cleaning front and rear

## STREAMER C-SERIE

### High-tech edge banding like the "big ones"

High-tech in a small space and a convincing range of services for high-quality edge processing. This basic idea can be found in the entire series of the STREAMER C series.

- » **Always a good connection**  
Highly flexible adhesive application with Glu Jet thin film technology for zero joints with EVA and PUR adhesive.
- » **For a waterproof connection** Process PUR glue just as easily as EVA glue.

- » **Perfect finish**  
With two freely selectable finishing units (radius scraper, surface scraper or buffing unit). With three post-processing units on the 1057 XL C.

- » **Clear and powerful** Large 15.6" touchscreen with VISE (Visual Setting) – your digital logbook for a quick and safe set-up process with all setting values.

### » Perfect acquaintance in a nutshell.

**Visual Setting**  
Graphically provides all setting values for the digital counters and pressure gauges and helps you to avoid setting errors.

**glue library**  
About the glue library can up to four different glues - types can be stored and called up easily. Temperature, amount of glue and machine parameters are available at the touch of a button.

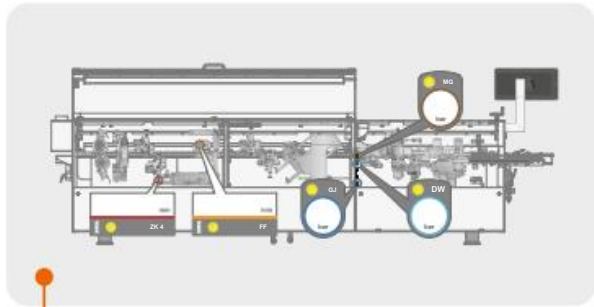

**Air-Stream-Diamantfräser**  
Patented Air Stream Diamond - milling cutter for the best milling quality before edge banding. less noise  
Operation, chip capture rate up to 99% and long service life through the effective avoidance of double chipping.

## VISE

### DIGITAL LOGBOOK

VISE stands for Visual Setting and is used to intelligently and visually support the machine operator.  
VISE provides all setting values for the digital counters and pressure gauges in the form of a digital logbook so that the machine can be set up quickly and safely.

### EDGE CONTROL TOUCH

The high-resolution 15.6" color touchscreen works with a Beckhoff industrial computer, which is unique in this class. The graphic control will inspire you with its simplicity and intuitive operation.

- » **Networkable**
- » **Operator access with password protection**
- » **Fast changeover between PUR and EVA**

### UP IN JUST 3 MINUTES WORKING TEMPERATURE

From zero to working temperature in just 3 minutes and back to zero just as quickly. The HOLZ-HER edge banding machines work with Glu Jet – and not with  
Glue pot and application roller.

### ECOMODE

The intelligent energy management for HOLZ-HER edge banding machines.  
State eligible!

### The HOLZ-HER Quality promise!

To make it easier for you to decide in favor of Glu Jet, we are happy to provide a three-year guarantee for the entire Glu Jet system.
