## WHAT DOES MAP MEAN?

Throughout this Dealer Catalog, you will see the acronym MAP. This stands for Minimum Advertised Price, and it's a policy that HPC Fire Inspired™ applies to nearly all our products. Quite simply, this MAP Policy prevents any trade partner from advertising our products at prices below those specified by HPC Fire Inspired™.

For a full explanation on this, and other HPC Fire Inspired™ policies, follow this link to the Policies & Procedures portion of our website. ([hpcfire.com/contact-us](http://hpcfire.com/contact-us))

## QUALITY QUALITY QUALITY

At HPC Fire Inspired™, we build our products with great care, and we back it up with the strongest warranty in the industry. However, should the rare occurrence require repair or return of an HPC Fire Inspired™ product, we have programs that make this rare but unfortunate occurrence easy and painless for dealers.

**Product Returns:** The first step to solving a problem is a call to our Technical Services Department. That will usually take care of the majority of issues. However, if it doesn't, then a RMA (Return Merchandise Authorization) is issued, allowing the customer to send the product back to HPC Fire Inspired™.

**Product Testing:** Every product that is returned to HPC Fire Inspired™ is tested to see what is wrong with it. This testing determines whether the product can be repaired and sent back to the customer, or replaced.

**Warranty:** HPC Fire Inspired™ backs up its products with a strong warranty policy, covering many of our products for up to five years. See chart below.

## **HOW WE BEAT MOTHER NATURE**

There's no two ways about it. Outdoor gas fire pits face a double-barrel assault from Nature, namely from wind and rain. But HPC designs its products with Nature in mind, to make sure our fire pits function effectively and safely in the field. For example:

- The Penta Burner sheds rain water in several ways. Each of the five lobes have "weep holes" that drain water. Also, the hub in the center of the burner is sealed to prevent water leaking into the burner.
- HPC's Electronic Ignition models all include a "drip leg" that diverts any water away from the electronics.
- In case of a very strong wind blowing out the fire pit flame, HPC's Electronic Ignition and Push Button/Flame Sense models all are equipped with a thermocouple sensor that will shut off the gas supply if the flame is extinguished. Even without this protection, wind blowing out the flame would be a very rare occurrence, since the pilot flame area is surrounded and protected by a metal "blow-out box."
- Spiders Not Welcome. Strangely, spiders are attracted to the odorant that is added to propane to give it its distinctive smell (alerting people if there is a leak). Their spider nests have the potential of interfering with the flow of gas. However, HPC designs around that by including a mesh "spider guard" on all its CSA-Certified fire pit inserts.

Lastly, we also offer a technologically simple method for protecting against the elements. It's called a cover. All fire pits should be covered when not in use, especially in the off-season.

## **HPC'S VISION STATEMENT**

**To provide innovative and safe solutions that inspire the world to create memorable moments and real conversations.**

## CUSTOM FIRE PITS

One would think that with over 300 standard off-the-shelf fire pit inserts there would be no need for custom designs...think again! Our creative and always "thinking out of the box" network of Dealers never stop- often thanks to you the End User!

Our team of designers is certified by the National Fireplace Institute (NFI) to ensure product safety and proper operation. HPC designs and manufactures commercial or residential fire features including custom enclosures and fire pit inserts of any shape or size- from 2 feet to 30 feet wide, from 25 thousand to 600 thousand Btu output. These fire products can be found at large venues throughout the world including casinos, resorts, ball parks, airports, malls, restaurants....and your backyard!

The custom flame control technology HPC offers ranges from the small match lit to the simple flame sensing controls to the very popular Electronic Ignition controls allowing for remote start and automatic relight. Our custom manufactured burner / pan assemblies are made of high-grade stainless steel material specifically designed to meet your need- these commonly consist of large manifolds or fire rings in any shape or size.

Please allow us to assist you in the design of your custom project. We will be happy to provide input- our years of experience and knowledge of outdoor and indoor systems will make it easy and more importantly keep it safe.

## CUSTOM FIRE PITS HIGHLIGHTS

- Design & layout assistance from NFI Certified Technicians
- Custom drawings & models
- Vast catalog offering of CSA Certified Products may fit your custom needs with small or no modification to the product

# FORNO DE PIZZA

## OUTDOOR DINING NEVER TASTED SO GOOD

The design and manufacturing process developed by Forno de Pizza in West Michigan is focused on the highest level of design, quality, and performance. This approach mandates an oven different from any others made today and guarantees a fundamental simplicity of operation and maintenance, making possible a closer relationship between owner and oven.

What is it about wood-fired ovens that is so captivating, or what makes the experience of cooking so wonderfully pleasant? We are convinced that ovens, in order to provide the perfect food, must not only be functional, but also beautiful and well-made and perfectly fitted to their purpose. In our lifestyles predictability and performance are simultaneously linked to the pleasant experiences we cherish.

## ① MATCH LIT (MLFPK SERIES)

This is our simplest certified fire pit insert- easy to operate and requires the least amount of maintenance.

### How It Works

**Start Up:** This is done by lighting long-stem lighter next to perimeter of burner then slowly open key to valve. Leave key in valve during use.

**Operation:** Flame height may be adjusted by turning key to valve- counterclockwise provides more flame, clockwise lowers flame.

**Shut Down:** To turn OFF the fire pit simply turn key to valve clockwise to OFF position. Remove key.

### Features

- Fully Assembled and ready to install.
- Flex Line configuration provides versatile and simple installation.
- Valve mounting bracket included- for safe mounting of control have.

- Flame height is adjustable using key valve.
- Natural Gas or Liquid Propane: Factory built & tested for either fuel.
- CSA Certified in US & Canada to ANSI Z21.97-2017 / CSA 2.41-2014 requirements.
- Optional Install & Controls: Paver Block Bracket, Key Extension Kit, Long Keys and Spark Ignition Kit.

## ② PUSH BUTTON / FLAME SENSE CONTROL (FPPK SERIES)

This is our mid-range fire pit insert utilizing safety pilot flame control- simply push ignition button and valve control knob to start... flame adjustment is done with knob. This battery operated system is a good solution for flame sensing necessity without AC power requirements.

### How It Works

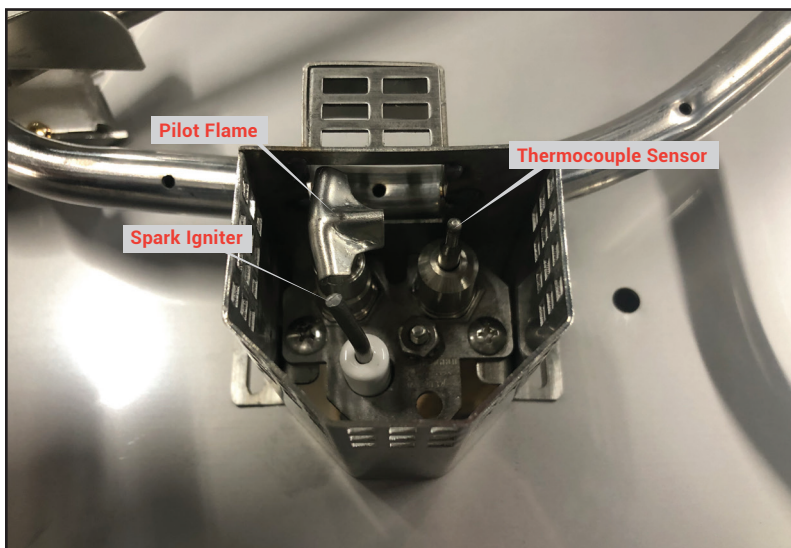

**Start Up:** This is done by simultaneously pressing valve control knob to start flow of pilot gas and pressing ignition button for spark. Release spark after pilot ignition, release valve control knob after ~20 seconds. Then turn valve control knob counterclockwise to light main burner.

**Operation:** Flame height may be adjusted by turning valve control knob- counterclockwise provides more flame, clockwise lowers flame. If flame loss does occur, the system will automatically turn off all gas flow.

**Shut Down:** To turn OFF the fire pit simply turn valve control knob clockwise- slightly depress knob to reach OFF position.

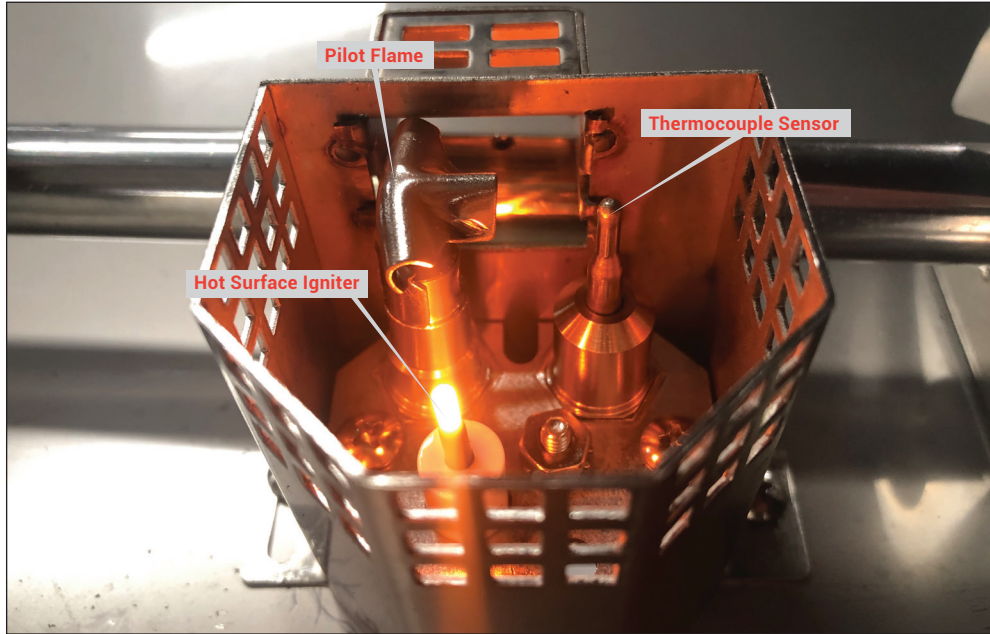

### Features

- Fully Assembled and ready to install. Control components are protected within valve box.
- Flex Line configuration provides versatile and simple installation.
- Start ignition with push button and valve control knob.
- Flame sensing- system will turn off gas if flame is lost.
- Flame height is adjustable using valve control knob.
- Battery Operated System- is perfect solution for installs with no power.
- Natural Gas or Liquid Propane: Factory built & tested for either fuel.
- CSA Certified in US & Canada to ANSI Z21.97-2017 / CSA 2.41-2014 requirements.

## ③ REMOTE ELECTRONIC IGNITION CONTROL (EI SERIES)

This is our top-of-the-line system featuring the ignition ease with use of a wall switch or handheld remote to control flame as well as auto-re-light if flame loss. This system has numerous convenience and performance improvements for both On/Off Models and our High/Low Models- such as High/Low flame control via our new remote, a redesigned hot surface igniter and many other improvements.

Smart device App available on Hi/Lo Models only

### How It Works

**Start Up:** This is done by use of a wall switch or remote control. When the ON command is received, the system completes initial safety checks then starts flow of pilot gas. After 5 seconds the hot surface igniter glows igniting pilot flame. When the system confirms pilot flame present, the main burner gas will flow ignited by the pilot flame.

**Operation:** While enjoying the ambiance of your fire pit, the system is at work monitoring flame status, internal temperatures / voltages and other safety parameters. If flame loss does occur, the system will turn off all gas flow, and then restart by automatically commencing Start sequence.

**On/Off Models:** Includes the convenience and safety features- optional remote control available.

**Bluetooth High / Low Flame Control Models:** This option includes a smart remote and App via smart device control with 2-way communication with the fire pit. Remote allows flame height control while receiving information from fire pit to advise user of fire pit status (flashing LED).

**Shut Down:** To turn OFF the fire pit simply use wall switch, remote control or whole house system.

### Features

- Fully Assembled- ready to install. Control components are protected within valve box.
- Start via wall switch or remote control; Auto re-light if flame is lost.
- Ignition is complete using a robust and reliable Hot Surface igniter.
- On/Off models: Use with optional wall switch, Remote Control or your whole house system
- High/Low Flame Control Models: Adjust high setting to low setting- ~45% turndown (Remote Control included). Not for use with your whole house system.
- 120vac: Standard outdoor grounded power cord- simply plug into GFCI outlet.
- 24vac Option: Typically used with lower voltage requirements.
- Natural Gas or Liquid Propane: Factory built & tested for either fuel.
- Internal temperature monitoring with overheat auto shutoff.
- CSA Certified in US & Canada to ANSI Z21.97-2017 / CSA 2.41-2014 requirements. (This new EI system already meets upcoming 2020 ANSI requirements).
- Optional Controls: On/Off Remote, Timers, Power Supplies and an Emergency Shutoff. (Pg. 58)

## COMPLETE FIRE PIT PACKAGES

These units are unfinished to allow the customer to finish with stone, veneer, or stucco to match their surrounding. Units are available in round, octagon, square, and linear shapes. Housings take the guess work out of enclosure construction - especially with the difficult round and octagon shapes. These are 18" tall and are constructed of sturdy 22 gauge galvanized steel material, welded frame, and a 1/2" hardie board shell, and weigh 150 lbs.

**Enclosure ships from North Carolina warehouse on pallet; Fire Pit ships from Ohio warehouse.**

HPC offers complete fire pit packages that include unfinished enclosures fitted with a certified remote electronic ignition (EI), push button/flame sense (FPPK) or match lit (MLFPK) fire pit insert.

**Now, certain models are available sized to fit a small LP tank inside. Door included. See page 34.**

## H2Onfire

A true electronic fire on water, turn-key appliance operating at a gas pressure less than 1/4 psi, allowing for residential installations. It is also the first "fire on water" system to be certified in North America to the Z21.97 standard by the CSA Group - passing the stringent wind, rain, and combustion test.

The fire ring is totally submerged underwater using our patent pending burner design and back flow prevention to protect the controls - giving an even and very appealing flame at only 65,000 Btu. This is NOT a match lit system- it is remote control with auto relight. Our ignition and flame sensing network is located in the center tower monitoring flame conditions at all times. **Ships in crate on pallet.**

# FIRE LOGS

## CONCRETE OUTDOOR LOGS

Second only to the flame itself, nothing says outdoor fire pit like a beautiful set of fire logs. HPC is introducing a new line of fire logs this year. This new line-up features logs that are intricately detailed and

extremely durable. To give our logs a true realistic appearance, they are actually cast from real pieces of wood. Nearly impossible to tell from the real thing! Three distinctive styles, in 9-piece or 16-piece sets.

### ARIZONA WEATHERED OAK

A classic look. The Arizona Weathered Oak fire log set features deeply contoured bark, all intricately hand-painted. Beautiful from every angle.

#### SPECIFICATIONS

Style	Model	Piece	Size
Arizona	FPL18/24AW09	9	12"-18"
Weathered Oak	FPL30/36AW016	16	14"-18"

### ASPEN BIRCH

Logs with a contemporary flair, these Aspen Birch fire logs fit very well with rectangular and linear fire pits.

#### SPECIFICATIONS

Style	Model	Piece	Size
Aspen	FPL18/24AB9	9	11"-18"
Birch	FPL30/36AB16	16	13"-18"

### WESTERN DRIFTWOOD

A new design, the Western Driftwood fire log set really looks like its pieces were picked up off the beach. Beautiful whether the fire is burning or not.

#### SPECIFICATIONS

Style	Model	Piece	Size
Western	FPL18/24WD9	9	10"-18"
Driftwood	FPL30/36WD16	16	10"-21"

## LAVA & CERAMIC ROCK

### LAVA ROCK

Time tested, Lava Rock is proven to increase combustion efficiency while maintaining a classy look for any fire pit. The size of each piece of rock varies from 1" to 2". Lava rock is sold in 1/2 cubic foot increments. Serves as an excellent base for our specially designed outdoor logs.

Model	Size
657	1"-2" Size

### ROLLED LAVA STONE

Unique finish lava stone rolled smooth. Available in 1/2 cubic foot bags.

Color	Model	Size
Black	857S	1"-2" Size
	857M	2.5"-4.5" Size

### CERAMIC RIVER ROCK SERIES

Looking for something other than lava rock or glass? HPC has a third option for media over your outdoor (or indoor) burner, our River Rock Series. These imitation stones are lightweight ceramic fiber, gel cast and designed to take on the outdoor elements. Each set comes with an 84 piece assortment of large and small stones (large pieces are 4 1/2", small pieces are 2 1/2"). One set is 1/2 cubic foot (15 lbs). Available in two styles – black or multi color (light and dark brown, gray, and black)

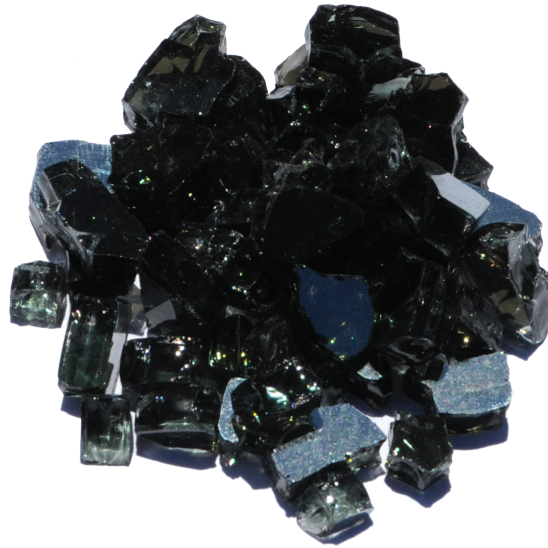

Model	Color	Size
FPR84MC	Multicolor	2.5" - 4.5" Size
FPR84BL	Black	2.5" - 4.5" Size

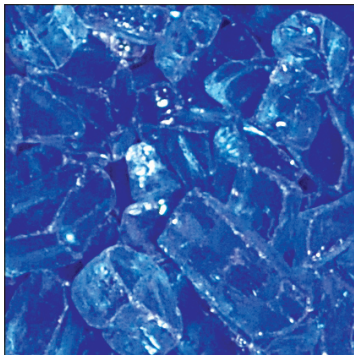

# FIRE GLASS

## GLASS WIND GUARDS

HPC provides a high quality glass wind guard specially designed to complement as well as provide additional safety for HPC fire pit inserts of all shapes- round, square, rectangle and linear. These feature a durable tempered glass construction to ensure a long lasting, heat

resistant product. Wind guards reduce flame disturbance of your fire pit and prevent loose items from getting too close to the flames.

### Features:

**Tempered Glass** - Heavy duty 3/16" clear glass is tempered to improve durability and allow it to withstand high temperatures. Depending on wind guard size- 4 or 6 sections complete the desired shape.

**Brackets**- Polished aluminum brackets and plastic support feet provided.

**DECK INSTALLATION KIT (EI, FPPK & MLFPK)**

This kit is for use when installing a gas fire pit on a wood or composite deck- provides flame and excess heat protection around input flex line connection(s). This basalt insulation is for inside the fire pit enclosure or bowl, is meant to place over a layer of paver blocks (1" min. thickness) commonly found at your local builder's store. Incoming gas stub must protrude through the deck, paver blocks and insulation for fire pit flex

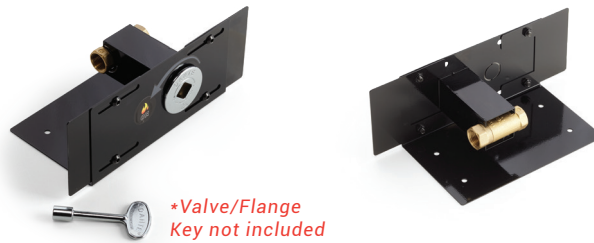

line connection. Kit includes basalt insulation and instructions- basalt insulation measures 39.3" x 39.3" (1 sq. meter)- larger fire pits will require more pieces, insulation is easily cut with utility knife. Smaller bowl kit available.

**FPI-DECK20SQ** - For fire bowls- includes basalt insulation- 19.6" x 19.6"

**FPI-DECK39SQ** - For fire pits- includes basalt insulation- 39.3" x 39.3" (1 sq. meter).

**MATCH LIT MODELS (MLFPK) PAVER BLOCK BRACKET**

\*Valve/Flange Key not included

**KVMB-PB**

Designed for the Dante Valve, this bracket allows flexibility and installation ease of the MLFPK decorative key valve. The face plate is adjustable from 8" to 12" width accommodating most pavers. The valve is securely mounted to bracket using decorative flange. (8-12"W x 3.875H x 5"D)

**IMPORTANT:** For use only with DANTE Valve #327-CH (Pg. 57)

**REPLACEMENT REMOTE SMALL TANK KIT - LP (FPPK & MLFPK)**

**STLPK**

This kit is for use with CSA certified FPPK and MLFPK fire pit models less than 90k Btu- see fire pit insert section for approved models. The kits includes a 90-degree regulator with 48" hose, 24" Flex Line, small tank L-Bracket and fittings for FPPK or MLFPK connection.

For use with CSA Certified FPPK & MLFPK fire pit inserts only

**MATCH LIT SPARK IGNITER KIT**

**SIK36**

Can't find matches or a lighter for a match-lit fire pit? No problem! HPC now offers a "Match-Lit Plus" Spark Ignitor Kit, which is easily installed and makes any match-lit fire pit much more convenient to light. Included in the kit is the spark ignitor itself, plus the battery-activated push-button mounting plate (battery included).

## MANUAL SPARK, FLAME SENSING (FPPK) CONTROL SYSTEMS

This system utilizes a standing pilot with thermocouple sensing to safely control gas flow, manual flame height adjustment, manual switch spark igniter (battery operated), and a safety pilot valve mounted in a stainless steel box.

Size: 7.5"x6.5"x2.6"

Max BTU	Gas Type	Models
140k	Natural Gas	FPPK-NG
	Liquid Propane	FPPK-LP

PILOT ASSEMBLY AND BLOWOUT BOX

See chart for recommended burner size.

Includes: Assembled stainless steel control box, 36" pilot assembly with spark igniter, and blowout box, flex line, hard pipe, and fittings.

### Recommended FPPK Burner Size

Burner Type	Size w/ FPPK-HC	Size w/ FPPK-MC
Penta Series	18" ~ 30"	12" ~ 24"
Round Burner	18" ~ 30"	12" ~ 18"
H-Burner Series	30"X8" ~ 48"X10"	24"X6" ~ 30"X8"
Square Burner	18" ~ 24"	12" ~ 18"
T-Burner	50" ~ 72"	36" ~ 48"

NOTE: Burner too small could result in unsafe LP backpressure. Burner too large could result in small, undesirable flame height.

## HPC DISPLAY KIOSK

HPC offers a very appealing and educational kiosk for your store front. It is constructed of long-lasting steel and powder coated for a professional look- and is very simple to assemble. The kiosk explains in Layman terms how to select and construct the style, shape, and technology of their fire pit with the help of the Dealer while using HPC fire pit inserts. The Kiosk Kit includes the kiosk stand, burners with placards, a laminated flip-book and several take-home brochures (replenished at no cost).
