WARNING: Max weight capacity is 350 lb per side. USE HAMMOCK STAND WITH CAUTION. INHERENT RISKS EXIST. Do not modify the stand or hammock in any way; modification may result in failure or injury and will void your lifetime warranty.

Baya Assembly

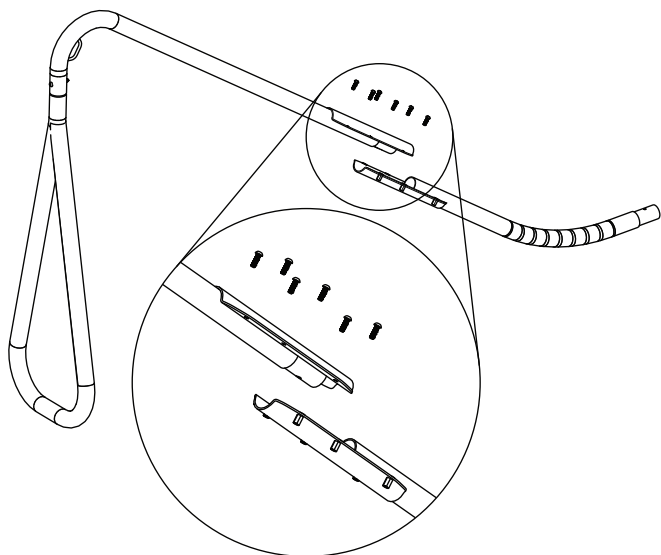

Baya Frame Assembly

- 1 Carefully remove and unpack all parts from the crate.

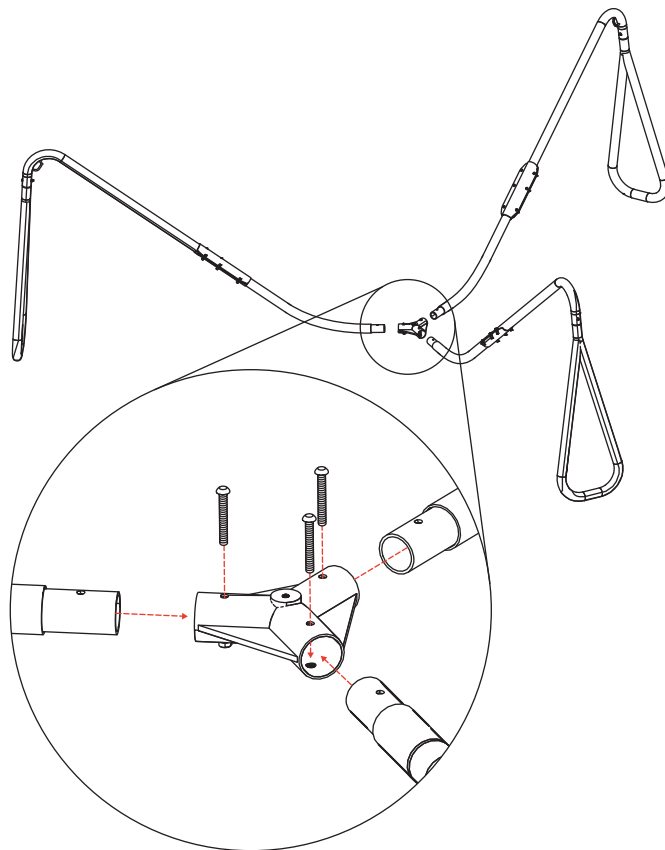

- 2 Insert the male end of the tear drop legs into the female end of the “Shepherd’s Crook” (upper arm). Secure tube in place using a 60mm M8 bolts. Repeat 3 times.

- 3 Slide the female end of the Lower arm tube onto the leg assembly. Insert and tighten 2 bolts into the lower set of holes on the reinforcement bracket. Repeat 3 times.

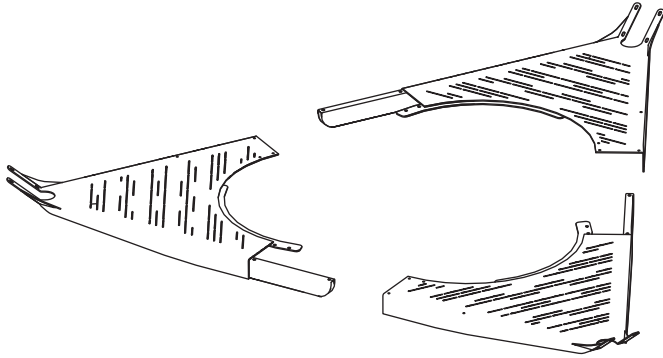

- 4 Insert the male end of all three leg assemblies into the 3 way center joint. Secure in place with the 60mm M8 Bolts.

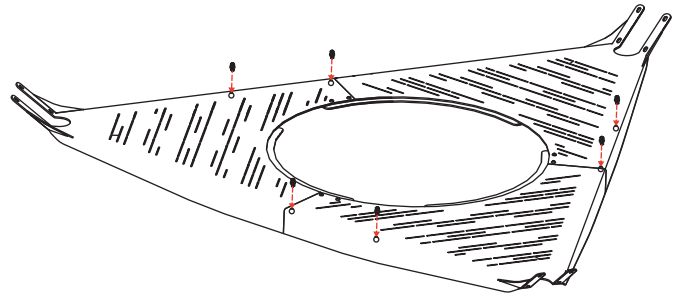

WARNING: Max weight capacity is 350 lb per side. USE HAMMOCK STAND WITH CAUTION. INHERENT RISKS EXIST. Do not modify the stand or hammock in any way; modification may result in failure or injury and will void your lifetime warranty.

Baya Table Assembly

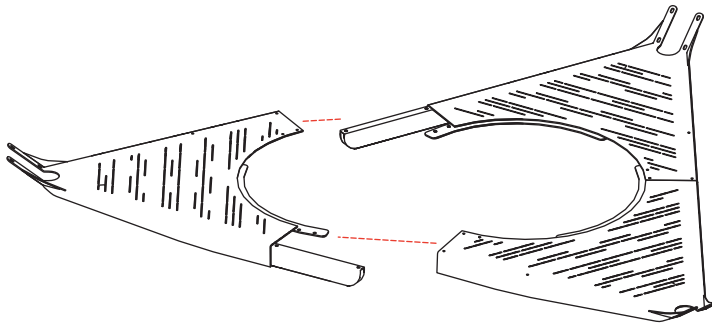

- 1 Align all three table components in a triangular formation.

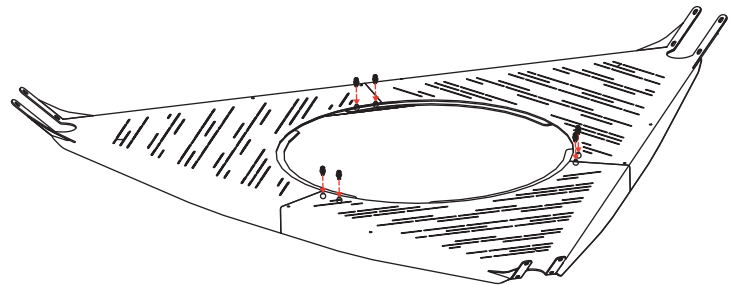

- 3 Secure the table to the welded support tubes with six 18mm M8 screws.

- 2 Carefully slide all 3 parts together, ensuring that the support tube and tabs nest properly.

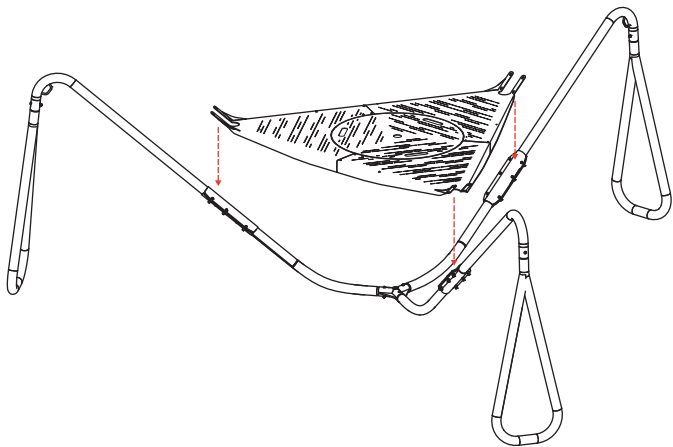

- 4 Tie the table pieces and the center hole support wings with six more 18mm M8 screws.

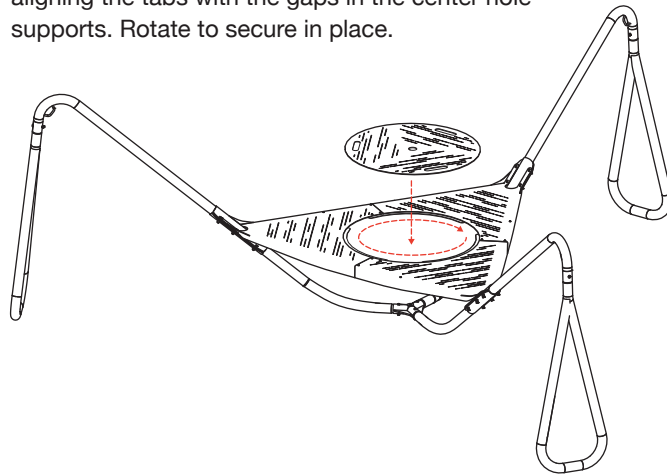

WARNING: Max weight capacity is 350 lb per side. USE HAMMOCK STAND WITH CAUTION. INHERENT RISKS EXIST. Do not modify the stand or hammock in any way; modification may result in failure or injury and will void your lifetime warranty.

Final Assembly

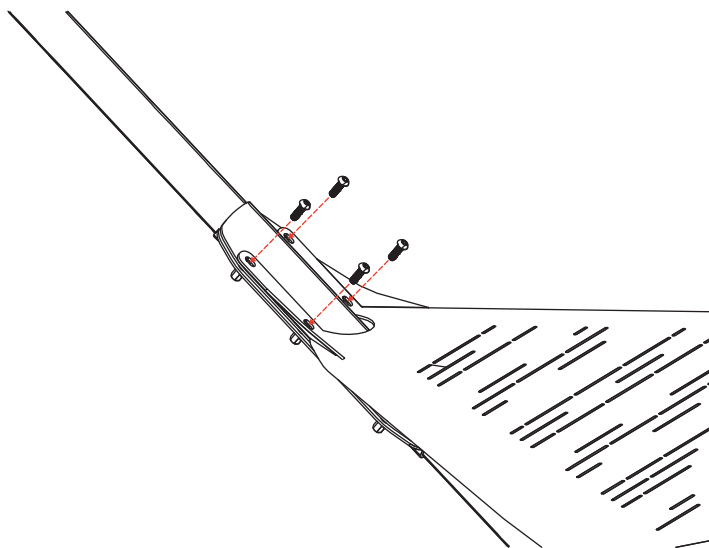

- 1 With two people, lift the full table assembly, and place it onto the frame assembly, as shown.

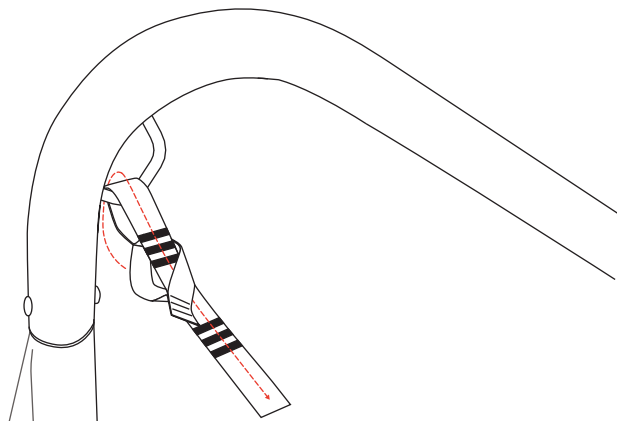

- 3 Carefully place the center circle over the hole, aligning the tabs with the gaps in the center hole supports. Rotate to secure in place.

- 2 Secure the table in place with twelve 25mm M8 screws. Four at each corner, securely connecting the table to the legs.

- 4 Connect two nano-weave straps to each leg loop.

- 5 Connect each carabiner end of your hammock to the desired position on the nano-weave straps. Sit back and relax!
