

My BISSELL™ air320 Air Purifier has No Power | Support

- **The machine has a ambient light feature > If the room is dark, the air320 dims its display lights**
 - **Change Fan speed to the highest setting by turning power button dial clockwise 3 times**
 - Place hand over the top of the machine, check for air flow
 - If there is air flow, the machine is in night mode (Display lights are not visible)
 - Place the machine in a brighter area
 - If there is no air flow but the lights are on
 - Turn machine off and unplug
 - Plug machine back in and turn on
 - If lights are on, no airflow please [Contact Us](#)
- Check to see if outlet is working
 - - Test this by plugging in a cell phone charger or small appliance
 - If no power to outlet, test a different outlet in a separate room
 - Reset circuit breaker if needed

If the machine still has no power, please [Contact Us](#)
