

Morvah Wall Hanging Planter Installation Instructions

1. Identify if there are any hidden pipes or electrical cables in the wall to avoid causing damage or risk of electrical shock during installation. Hold the steam bent arm up to the chosen wall in the correct position and mark through the screw holes using a pencil. **The wall must be capable of supporting the estimated planted weight of the Morvah Planter (15kg).** Determine the fixing method appropriate to the wall structure and secure the wooden arm using suitable screws, concealing the screws with the wooden plugs provided (A). Hang the planter ensuring the cord is sitting in the rebated groove and pull the slipknot tight up to the stem to secure the planter in place (B).

- Caring for the earthenware bowl

We have designed a striking pair of earthenware bowls for our Green Range featuring a hard-wearing glaze on the inside and a unique matte glaze on the outside, known as Engobe. We suggest you clean both the interior and exterior surface of the pot by gently wiping away any marks using warm soapy water and a lint free cloth. Once the pot is clean, gently dab dry using a soft, lint free cloth or towel. Any fibres on a cleaning cloth will stick to the outside surface more easily due to its beautiful finish.

- Caring for the wooden structure

Dust the Morvah planter with a soft, dry, lint free cloth. Mild furniture polishes can be used on the wood. The wooden strap should be dried immediately after watering or misting the plants whilst in place. This will help maintain the appearance of the wood by eliminating water stains. Simply wipe dry with a lint free cloth after watering.

- Caring for your plants

Always refer to the care guides and planting guidelines supplied with any plant or seed you've chosen. The Green Range earthenware pots do not have drainage holes in the base, therefore suitable drainage must be added. The bowls should be placed inside a rolled towel to stop them moving whilst planting.
