

House Shelf Installation Instructions

*** The House Shelf can carry a maximum of 8kg of evenly distributed weight when properly mounted on the wall. ***

1. Identify if there are any hidden pipes or electrical cables in the wall to avoid causing damage or risk of electrical shock during installation. Make a mark on the wall about **5cm** higher than where you require the top of the wooden hoop to hang from (A). **The wall must be capable of supporting the weight of the House Shelf when fully loaded (10kg)**. Determine the fixing method appropriate to the wall structure (e.g. plaster board plugs for a 4mm screw). If attaching to a wooden surface, no additional fixings are required. We would always recommend finding joists if possible.
2. Loop the leather strap around the hoop of the shelf and push the cap head screw (B) through the pre-punched holes in the leather. Using a flat/slotted head screwdriver, screw the leather strap to the wall with the cap head screw provided. Over-tightening the screw could result in the screw pulling through the leather.* Screw the brushed brass cap onto the cap head screw (C).

** (Before moving to part 3, you may wish to only tighten the cap head screw half way, making it easier to remove the shelf to allow the fixing of the under shelf brackets to the wall.)*

3. Adjust the shelf ensuring the leather strap is centrally aligned to the hoop and the shelf is completely level. Make a mark on the wall through the holes on both brass brackets (D). Determine the fixing method appropriate to the wall structure (e.g. plaster board plugs for a 4mm screw). If attaching to a wooden surface, no additional fixings are required. Using a flat/slotted head screwdriver, fix the brass brackets to the wall with the large slot head screws provided (E).
4. If you have the House Shelf with Mirror option, carefully slot the mirror into the angled slot on the shelf so the edges are flush to the sides of the slot, taking care not to touch the glass surface as fingerprints will start to show.

*** The House Shelf is intended for indoor use only.***
