MEET THE ABSOLUTE ESPRESSO

This high-performance range of Espresso Machines are a pleasure to operate, and clad in sleek glass panelling, will add a shine to any establishment. With customisable side panels, the Absolute Espresso is also ready to be personalised, whether you choose to add a lick of colour, or full branding - it's a machine you'll truly be proud to show off.

MODELS

The ABSOLUTE ESPRESSO is currently available in the following configurations:

- 2 GROUP COMPACT (featuring two steam wands)
- 2 GROUP
- 3 GROUP

All configurations listed above feature tall espresso groups.

2 GROUP COMPACT

CUSTOMISATION

We realize that every serving space is unique, so to make sure that the ABSOLUTE ESPRESSO fits perfectly into any environment we are able to provide a customised design that shows off your business's branding via custom inserts in the exterior side panels.

Customisable Panels

Side panels can be customised to suit any need or environment.

FUNCTIONALITY

From the very first concept brief, the goal for the ABSOLUTE ESPRESSO was to follow the mantra of 'form follows function'. The result is a feature-packed espresso machine that is as intuitive as it is attractive, with each feature and control mechanism becoming familiar to the user from the very first brew.

Straight anti-suction Steam wands

Straight-flow wands ensure minimal steam restriction and anti-suction valves. Also feature 'no burn' insulation.

Group Flushing

Keep each group clean and ready to go between brews with just the push of a button.

Automatic Cleaning

Auto cleaning means the group head and shower always stay clean and ready for the next brew.

Soft Preinfusion Heads

Allow coffee to develop its flavour naturally with preinfusion and complete saturation in every dose.
