

Specification Sheet

Key Ring

It might be just another key ring, but what nice one! Made of a single piece of brass or stainless steel wire with only two bends – it can hardly be more simple. The Key Ring is made to keep your keys in place in a stylish and minimalist way.

The drop shaped Key Ring is locked by a clever, yet simple closing mechanism securing your keys will stay organised and kept safe. This is a great example of MOEBE's design philosophy focusing on developing new details, which are aesthetic and simple without losing their functionality.

Dimensions
