JASPER

The solid-oak Jasper Collection features deep, seamless bevels, pinned mortise-and-tenon joints, and splined corners. But it's the drama of rugged oak beneath a pure White Oak finish that gives Jasper its one-of-a-kind style.

THE JASPER COLLECTION: Sustainable Style

The Jasper Collection is sustainably crafted of solid American white oak, specifically the offcuts deemed too rustic for other styles of furniture. Jasper rescues those offcuts and celebrates every knot, surface check, and tiny wormhole for its natural character. Finished pieces may combine rift-sawn and quarter-sawn boards for an unpredictable variety of straight grains, ray-flake patterns, and color. In short, nothing is wasted, and no two pieces are alike!
