The Dining Chair

Designed by Space Copenhagen

Thank you for purchasing The Dining Chair

The Dining Chair

FSC® certified wood & durable leather

Designed by
Space Copenhagen

Dimensions
W 52 cm D 44 cm H 80 cm SH 47 cm /
W 20.5" D 17.3" H 31.5" SH 18.5"

Weight
13 kg / 29 lbs

Finish
Natural Matt Lacquered, Sirka Grey or
Black Stained

Materials
Solid oak wood / Beech wood,
FSC® certified

Upholstery
Black or Natural tanned leather
seat

Gliders
Hard plastic gliders installed as
standard

Why FSC®?

All wood in our collection is labeled and produced in FSC® certified wood. When producing furniture from FSC® certified wood we support well-managed forestry. In an FSC certified forest no more trees than the forest can reproduce are felled, so the exploitation of nature is avoided. FSC ensures fair wages and a fair trading price and gives full traceability. We can trace a chair back to the forest where the tree was planted.

Maintenance guide

Lacquered or stained wood

Lacquered or stained wood offers a stronger surface than oiling and is also effective when coloured surfaces are desired. Compared to natural or oiled wood, lacquered and stained wood is easier to clean and requires very little maintenance.

For daily care it is recommended to dust the furniture with a soft cloth. Lacquered and stained wood can be cleaned with a soft cloth wrung in a mild solution of lukewarm water and a universal cleaning detergent. Always follow the wood grains and always dry with a soft dry cloth immediately after cleaning.

Avoid use of abrasive cleaning agents and aggressive cleaning detergents as this will damage the surface of the lacquered or stained wood. Avoid placing wooden furniture in direct sunlight, excessive heat or humidity.

Leather

As a natural material, leather requires looking after. If you care for the leather in the right way, it will become even more beautiful over time. Like most natural materials, it does need some care and looking after to ensure its long-lasting appeal year after year, generation after generation.

Once or twice a year for thorough cleaning, use the foam from soap flakes stirred in warm water. Apply the foam with a dry soft cloth, minimising any contact with water. When the leather is dry, polish it with a soft, dry cotton cloth. Avoid bar soap, saddle soap, leather cleaners, household detergents or chemical products. Protect from direct sunlight, excessive heat and sharp objects.
