

Loer and Raya Table Light Installation Instructions

Ensure the electrical supply is turned OFF at the fuse board.

1. Screw in the light bulb provided (A). The lampshade has been designed to work with an E27 **LED** candle shape light bulb, up to a maximum of **9.5 Watts**.
2. Carefully thread glass sphere (B) over the light bulb and locate onto the brass thread of the bulb holder. Gently tighten the sphere onto the bulb holder securely connecting the two parts. Due to the fragility of the glass sphere diffuser, this step should be carried out with great care to avoid breakage. Plug the light into the nearest outlet.
3. Turn on the power supply to complete installation.

**** If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by the manufacturer or his service agent or a similar qualified person in order to avoid a hazard. ****
