

## MARBLE & NATURAL STONE

Quarried directly from the earth, marble and natural stone vary in veining, texture and color. Whether polished, sandblasted or hand-carved, each is valued for its unique pattern and natural beauty.

### Care for Your Marble & Natural Stone

- > Address spills immediately with a dry, soft cloth. Natural stone is a porous material, and although it has been sealed, spills should be blotted promptly to minimize staining.
- > Use a soft, slightly damp cloth to dust or spot-clean as needed. Wipe dry.
- > Avoid using abrasive cleaners, chemical solvents, strong detergents, furniture polish, and cleaners with bleach.
- > Use trivets, coasters, placemats, and adhesive felt pads to help prevent scratches.

## FURNISHING STYLE OUTDOORS

Materials from shaped concrete to cast aluminum, wicker, natural teak, and braided wire extend modern style to any space. These standout materials and finishes mix and match effortlessly, bringing an eclectic, organic feel to spaces both indoors and out.

### Care for Your Outdoor Furnishings

- > Cover or store indoors during inclement weather and when not in use to prolong the lifetime of your furniture.
- > Use a proper outdoor cover (not included) that allows for adequate ventilation without trapping moisture.
- > Do not leave uncovered in direct sunlight for extended periods of time. Left unprotected, teak especially will weather and lighten in color.
- > Dust regularly with a clean, dry cloth. Avoid ammonia-based cleaners or other chemicals.
- > Sunbrella high-performance cushion covers are made of 100% solution dyed acrylic fabric and an open cell foam designed specifically for outdoor usage. Seat covers are fade resistant and easily cleaned with soap and water.
