Ocean Chair

Discarded fishing nets and recycled hard plastic

The Ocean Chair is a part of the Ocean Collection, a reimagined out-door series, originally designed in 1955 by Jørgen and Nanna Ditzel. The design is reissued in ocean plastic waste to prevent pollution of the world's oceans. The Ocean Collection is designed for disassembly, meaning that the design allows each component in its purest form to recycle into new production circles. Durable for both private and public use.

Ocean waste

Old fishing nets from the ocean are collected, washed, shredded and made into pellets, also known as green plastic. We use ocean waste for our outdoor series and injection moulded chairs.

Repair for long lasting

Good products, are made to be used. To give the products the longest possible life, we want to make it easy for you to repair them yourself.

Contact our customer service for more info here

Steel

Our Steel is made from 20% recycled steel with a gun metal finish. Steel is a strong and light material that can be processed in unlimitied ways.

CO₂ Footprint

At Mater, we believe in the importance of transparency. By doing Life Cycle Assessments (LCA) on our furniture, we can analyse the total climate emission for each of our product's lifespan.

Ocean OC2 Chair

Discarded plastic beer kegs and recycled hard plastic

The Ocean OC2 Collection was originally designed in 1955 by some of the 20th century's most renowned designers, Jørgen and Nanna Ditzel. The design has now been created in plastic waste from Carlsberg's discarded plastic beer kegs. The series is characterized by its light structure with repeated slats and metal frames, made and tested for outdoor use. The Ocean OC2 Collection is designed for disassembly, meaning that the design allows each component in its purest form to recycle into new production circles.
