

1 INCH COLLECTION by JASPER MORRISON

emeco

# FIRST LET'S MAKE THINGS THAT LAST.

The Emeco 1006 Navy Chair was first commissioned in the 1940s by the U.S. Navy for use on warships – the contract even specified that it had to be able to withstand torpedo blasts. Today our chairs are still made in the U.S.A., of 80% recycled aluminum, and are made by hand, by Emeco craftsmen using the original 77 step process. The world's best architects and designers collaborate with us to design chairs that are built and guaranteed to last a lifetime.

As we apply what we've practiced in the past, we are looking toward the future. We are on a mission to make a positive impact on the environment. Our goals are to use waste material in our products, use as little energy as possible in our manufacturing, generate a minimum of waste in the process, and build strong, durable, beautiful chairs that last through generations. We've been on the same mission since 1944 and we will continue to search for new ways to recover and utilize discarded materials and make products that last.

## 1 Inch - three collections, one family

### **1 INCH by JASPER MORRISON**

With 1 Inch, Emeco and Jasper Morrison together have created a collection of chairs, stools and tables that reflect our values and uncompromising standards - a product family that is strong, simple, timeless, and engineered to last.

Made from reclaimed, recycled and eco-minded materials, 1 Inch is suitable for a wide variety of applications – indoors and outdoors.

The collection features a stacking chair in reclaimed wood polypropylene; a seating family with handmade aluminum frames paired with seats in reclaimed wood polypropylene, plywood or upholstery; and an all aluminum collection for heavy duty environments – built by hand, guaranteed for life.

## 1 Inch Reclaimed

Useful and durable, the 1 Inch Reclaimed stacking chair is engineered to meet the demands of high use environments, a timeless design suitable for both indoor and outdoor use. The one-piece chair is made from 90% reclaimed material - 88% waste polypropylene and 2% waste wood fiber. Available in eight colors. Stacks 10.

## 1 Inch Aluminum Frame

1 Inch Aluminum Frame taps into Emeco's heritage in hand crafting recycled aluminum, leveraging its signature strength, light weight, and sustainability to create a versatile family of seats. The frame is hand built using our time-tested 77-step process used for the original 1006 Navy Chair since 1944.

Seats for 1 Inch Aluminum Frame are available in sustainable plywood, 100% reclaimed wood polypropylene or upholstered in a range of Kvadrat/Maharam fabrics and leather. Reclaimed wood polypropylene is suitable for outdoor use.

Emeco's in-house powder coat colors are available for all 1 Inch chairs, stools and tables.

## 1 Inch All Aluminum

The 1 Inch All Aluminum Collection is strong and lightweight, built by hand from recycled aluminum, utilizing Emeco's unique 77-step process. Made for heavy-duty environments indoors and outdoors, we guarantee the 1 Inch All Aluminum collection for life. Chair and armchair stack 6 high.

Emeco's in-house powder coat colors are available for all 1 Inch chairs, stools and tables.

## 1 Inch Tables

The 1 Inch café and bar height tables complement the chairs and stools of the collection. The table base is made with the family's signature one inch square aluminum tube, available in a clear anodized finish, black powder coated or in Emeco's in-house powder coat colors. Round and square table tops in three sizes come in anodized aluminum, sustainably sourced solid ash and walnut, HPL or laminate with plywood edge. Aluminum and Accoya wood tops are suitable for outdoor use.
