

2 INCH COLLECTION by JASPER MORRISON

emeco

FIRST LET'S MAKE THINGS THAT LAST.

The Emeco 1006 Navy Chair was first commissioned in the 1940s by the U.S. Navy for use on warships – the contract even specified that it had to be able to withstand torpedo blasts. Today our chairs are still made in the U.S.A., of 80% recycled aluminum, and are made by hand, by Emeco craftsmen using the original 77 step process. The world's best architects and designers collaborate with us to design chairs that are built and guaranteed to last a lifetime.

As we apply what we've practiced in the past, we are looking toward the future. We are on a mission to make a positive impact on the environment. Our goals are to use waste material in our products, use as little energy as possible in our manufacturing, generate a minimum of waste in the process, and build strong, durable, beautiful furniture that lasts through generations. We've been on the same mission since 1944 and we will continue to search for new ways to recover and utilize discarded materials and make products that last.

Versatility. With longevity built in.

The 2 Inch collection of tables by Jasper Morrison is offered in 3 heights - café, counter and bar height - with table tops in various shapes, sizes and materials to fit any application, indoors and outdoors.

Outdoor ready.

2 Inch Flat Base

The shape of the flat base perfectly matches the table column with its softly rounded square shape. Suits both round and square table tops. Made from recycled aluminum. Outdoor approved in combination with aluminum or accoya wood table tops.

2 Inch X Base

The shape of the star base creates an elegant, light silhouette, complementing both round and square table tops. The base has articulated and adjustable glides for utmost stability. Made from recycled aluminum. Outdoor approved in combination with aluminum or accoya wood table tops.
