

UTILITY by JASPER MORRISON

emeco

FIRST LET'S MAKE THINGS THAT LAST.

The Emeco 1006 Navy Chair was first commissioned in the 1940s by the U.S. Navy for use on warships – the contract even specified that it had to be able to withstand torpedo blasts. Today our chairs are still made in the U.S.A., of 80% recycled aluminum, and are made by hand, by Emeco craftsmen using the original 77 step process. The world's best architects and designers collaborate with us to design chairs that are built and guaranteed to last a lifetime.

As we apply what we've practiced in the past, we are looking toward the future. We are on a mission to make a positive impact on the environment. Our goals are to use waste material in our products, use as little energy as possible in our manufacturing, generate a minimum of waste in the process, and build strong, durable, beautiful furniture that lasts through generations. We've been on the same mission since 1944 and we will continue to search for new ways to recover and utilize discarded materials and make products that last.

Utility chairs with solid ash seats and backs.

Taking the long view.

UTILITY by Jasper Morrison

Utility's purposeful, utilitarian design, in combination with solid materials and craftsmanship, makes for a collection with true longevity. Its simple form gives the impression that it could have been around for decades. Its sturdy construction ensures it will. Handcrafted in USA from local, responsibly sourced wood and recycled aluminum.

Utility barstool with black powder coated aluminum frame and seat and back in dark stained ash.

Utility pairs Emeco's signature handmade frame in recycled aluminum with a handcrafted seat and back in solid wood, sourced from sustainably managed Appalachian forests, local to Pennsylvania. The robust frame-to-wood connection add to the collection's honest, transparent character.

Outdoor ready.

Seats and backs in Accoya wood are approved for outdoor use.
