DAKOTA

Dressed up or dressed down,
Dakota celebrates the exquisitely natural contours
that mother nature trained your eye for –
sophisticated, versatile and simply chic.

Subtle organic edges on
a recycled, earthy body give a
beautifully rustic twist to timeless subway tile.
Natural beauty from inside out.

DAKOTA

MODERN RUSTIC

Curated in eight relevant hues, Dakota's relaxed and elegant style brings casual, upscale warmth to your space. Dakota is suitable for a range of applications and styles – from midcentury to industrial modern – warm, intimate rooms to grand, commercial spaces. Artisanal, superior handmade quality in every piece.

AT-A-GLANCE

- **8 COLORS**
- **2 FIELD SIZES (2x8½ AND 3x9¼)**
- **GLAZED EDGE TRIM FOR ALL SIZES AND COLORS**
- **QUICKSHIP**

APPLICATIONS

- **RESIDENTIAL AND COMMERCIAL WALLS**
- **STEAM SHOWERS AND SPAS**
- **LIGHT DUTY FLOORS AND COUNTERTOPS**
- **FIREPLACE FACES**
- **EXTERIOR AREAS (see Tech Info for more info on this)**

JUST SO YOU KNOW...

- Dakota is approximately 12mm thick.
- Earthy, clay body uses recycled content from roof tiles.
- Glazed edge pieces are hand sprayed and will have variation.

For more detailed technical information, visit sonomatilemakers.com

We are committed to delivering the highest quality handcrafted tile to you. Variation in shade, texture and size are inherent characteristics of our handcrafted tile. Always inspect your tiles before they are installed as installation constitutes acceptance.

HANDCRAFTED CHARACTERISTICS

Dakota is a handcrafted tile and some variation in color, thickness and size is to be expected. The clay body includes some recycled materials (including roof tiles) and minor surface irregularities are a natural characteristic of Dakota. The colors, edge texture and thickness will have naturally occurring variation due to the inherent characteristics of this clay body. Once properly installed, the beauty of this tile is enhanced by such variation.

INSTALLATION & MAINTENANCE

- All tiles must be laid out prior to setting to allow for blending of color variation.
- Dark or contrasting grouts should be tested for staining prior to grouting
- Use a tile blade for cutting, not a coarse brick or stone blade
- For Dakota matte colors, always pre-seal the tile prior to grouting if using a contrasting grout.
- The natural surface of Dakota may collect grout during the grouting process. Continually clean the surface with a clean, damp cloth or tile industry hydrophilic sponges. Once set, use a soft clean dry cloth to polish off the haze and remaining grout residue
- Grout joints should be sealed after installation and periodically as needed
- Use a PH neutral cleaner and avoid any citric or abrasive cleansers

USAGE

- Residential and commercial walls
- Steam showers and spas
- Fireplace faces
- Light duty floors and countertops
- Exterior Areas (except pools and fountains in freeze thaw climates)

CARACTERÍSTICAS ARTESANALES

Dakota es una baldosa artesanal y es de esperarse variaciones en color, grosor y tamaño. La fórmula de arcilla incluye un poco de material reciclado (incluyendo tejas) e irregularidades superficiales son características naturales de Dakota. Los colores, la textura del borde y el grosor tendrán una variación natural debido a las características inherentes de esta fórmula de arcilla. Una vez instalado, la belleza de este azulejo artesanal se ve reforzada por tal variación.

INSTALACIÓN Y MANTENIMIENTO

- Todos los azulejos deberán ser puestos y mirados antes de ser instalados para que sean configurados de forma a permitir la mezcla de la gama de colores.
- Lechadas oscuras deben de ser probados en un azulejo antes de la instalación.
- Use una hoja de azulejo para cortar, no una hoja de piedra o de tabique grueso.
- Para colores opacos, siempre selle previamente el azulejo antes de la lechada caso use una lechada contrastante.
- La superficie natural de Dakota puede acumular lechada durante el proceso de aplicación de lechada. Continuamente limpie la superficie con un paño limpio y húmedo o esponjas hidrófilas propias para azulejos. Una vez que lo haya configurado, use un paño seco y suave para pulir la neblina y los restos de lechada restantes.
- Las juntas de lechada deben sellarse después de la instalación y periódicamente según sea necesario
- Use un limpiador de PH neutro y evitar cualquier limpiador cítrico o abrasivo.

USO

- Paredes interiores residenciales y comerciales
- Duchas de vapor y bañeros
- Chimeneas
- Mostradores/encimeras y pisos de uso ligero
- Áreas exteriores (excepto piscinas y fuentes en zonas de congelación y descongelación)
