DESCRIPTION

The VISION COLOR series explores resin textures, opening new pathways to designers with a wide collection offering. Through formats, subway tile size, and contemporary mosaics, every color has an alter ego, that is represented by either a slight shade variation or a total opposite. This change allows design versatility with solid tones or vibrants contrast.

INSTALLATION & MAINTENANCE

VISION COLOR may be installed using standard ceramic tile installation methods and materials, as recommended by the Tile Council of North America (TCNA). An Architessa sales representative will advise you on general installation questions.
