REGATTA CHAIR

Product Sheet

REGATTA

PRESENTATION

Description

The Regatta armchair is designed by Danish designer Asger Soelberg, based on a wish to create a beautiful stackable armchair in solid wood, where the possibility of stacking the chair would not dominate the chair's expression. A piece deeply rooted in the Danish design tradition of functionality and aesthetics. Hopefully, beautiful enough to make you want it in your home, and strong enough to use in your workplace. The chair is constructed from high quality oak or beech wood, using skilled craftsmanship to ensure what the chair will last for years to come.

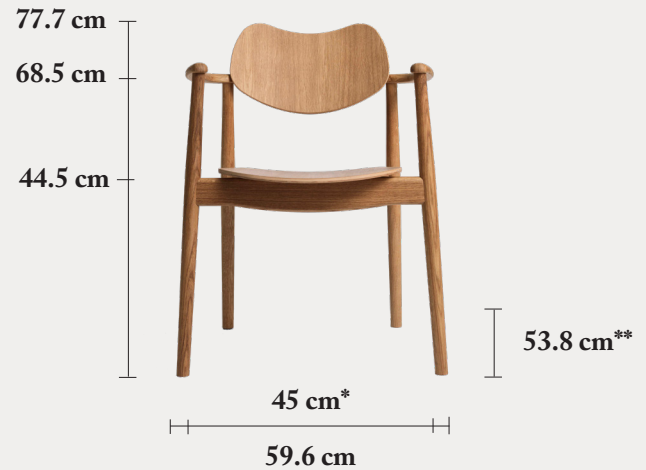

Unique selling points

- High quality materials
- Functional and aesthetic
- Stackable armchair in solid wood
- Perfect for residential and commercial use

REGATTA

UNIQUE SELLING POINTS

High quality materials

The Regatta armchair is available in both oak and beech and in a range of finishes.

Wood is a natural, living material, that changes over time adapting to changes in humidity, sunlight and changing seasons. With the right maintenance our solid wood and premium-quality veneer will last more than a lifetime.

Functionality and aesthetic

The chair is made using traditional furniture techniques, which makes it extremely solid. It is available in an all-wood version, and with an upholstered seat and/or back in high-quality leathers from Camo or selected fabrics from Kvadrat, making it possible for you to create your own unique style and expression.

Stackable armchair

The Regatta armchair is designed by Danish designer Asger Soelberg, based on a wish to create a beautiful stackable armchair in solid wood, where the possibility of stacking did not compromise the design. A stackable chair allows you to have all the seating you need if you have limited space. It is also optimal for storage and cleaning purposes.

Perfect for residential and commercial use

The Regatta armchair is a multipurpose chair. The classic design blends seamlessly into most Nordic homes, and also into the contract market. The many customization options make it perfect for residential, office, and restaurant use. It endures the strongest chair test on the market, which ensures that the chair will withstand everyday use.
