

Bobcat 45

Down Trail Quilt

KAMMOK

A few ways to enjoy:

Minimalist Sleeping Bag

Create a toasty footbox by securing the snaps near your feet, then cinching the shock cord at the bottom.

Hammock Underquilt

- 1 Locate the button snaps along the perimeter of the Bobcat and connect them to the Roo hammock gear loops.

- 2 Pull the shock cord at each end to completely cinch the Bobcat on both ends. Attach the shock cord to the carabiner. For longer hammocks (like the Roo Double) use the included underquilt extenders. Connect the extenders to the shock cord and then attach to the carabiners.

Serial number found under this label.

Sleeping Pad Attachment Loops

- 1 Slide the sleeping pad straps around the sleeping pad. They should be positioned at the chest area and the knee area of the pad.
- 2 Connect the Bobcat to the sleeping pad straps by attaching the button connectors on to the sewn loops on the sleeping pad straps.

Insulated Gear Wash + Care Instructions

Hand Wash

1. Loosen cord locks and secure all snaps or zippers.
2. Fill tub with warm water. Wash product by itself with a non-detergent down or synthetic insulation cleaner. We recommend using Granger's Down Wash Kit (sold on www.kammok.com).
3. Place bag/quilt in the water and knead all air out of baffles. Continue until bag/quilt is completely saturated with water and cleaner.
4. Drain tub and knead out as much water as possible. Do not wring bag/quilt.
5. Refill tub with warm water. Repeat steps 4 and 5 until water comes out clear.

Machine Wash

1. Loosen cord locks and secure all snaps or zippers.
2. Use a front-load washer only and set to a warm, gentle cycle. Wash product by itself with a non-detergent down or synthetic insulation cleaner. We recommend using Granger's Down Wash Kit (sold on www.kammok.com).
3. Drain and knead out any remaining water after the wash cycle. Do not wring bag/quilt.

Drying

1. Limit the amount of time the bag/quilt is in dryer as much as possible. Pressing the sleeping bag/quilt between two dry towels will speed up the dry time.
2. Move your bag/quilt into the dryer with some clean dryer balls. Adjust to lowest heat setting, and check bag/quilt often for hot-spots.
3. (Down) Stop dryer occasionally and redistribute down to help ensure quilt completely dries.
4. (Down) Once dry, lay bag/quilt flat and gently redistribute down where needed.

Never Use

Storage

Before storing, make sure your gear is completely dry. Then, store lightly stuffed in this storage bag or hang in a dry location. This keeps your insulated gear lofted when stored for extended periods of time.
