

RHINO® BLENDER RINSER KITS

The Rhino Blender Rinser Attachment is the latest innovation from Rhino Coffee Gear, which allows users to clean their blender jugs at their existing in-bench Rhino Pitcher Rinser, instead of at the sink. At 198mm wide, the Rhino Blender Rinser Attachment suits the majority of blender jugs on the market. The Actuator Plate sits over the existing spray head and is secured into position by the stainless steel riser and spinjet valve. This increases the height by 100mm to ensure a thorough, effortless clean, every time.

This functional attachment can be used as a vessel cleaner for many different environments, including cafes, espresso bars, restaurants, bars, smoothie bars, and juice bars.

Each Rhino Blender Rinser Kit includes everything that you need to clean blender jugs in any environment, including a Rhino Spinjet Valve, stainless steel riser, Blender Attachment, and the all of the standard rinser parts.

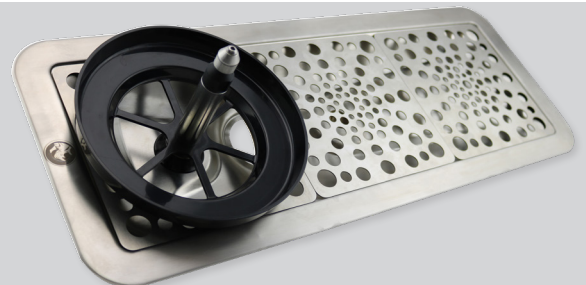

300mm Rinser with Blender Attachment RHPR300-S-BL

- Rhino Spinjet Valve
- Low profile body
- Large actuator plate
- Easy to clean
- NSF Certified

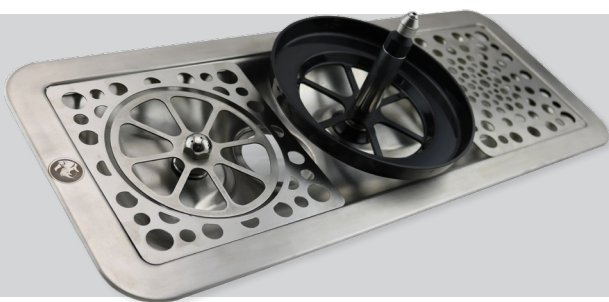

600mm Rinser with Blender Attachment RHPR600-BL

- 3 piece drain tray
- 2 spray mechanism positions
- Rhino Spinjet Valve
- Low profile body
- Large actuator plate
- Easy to clean
- NSF Certified

600mm Rinser with Blender Attachment & Spinjet Assembly RHPR600-2BL

- 3 piece drain tray + additional drain tray (with actuator hole)
- 2 spray mechanism positions
- Standard & Rhino Spinjet Valve
- Low profile body
- Large actuator plate
- Easy to clean
- NSF Certified

600mm Spinjet Rinser with Blender Attachment RHPR600-S-BL

- Single drain tray
- Rhino Spinjet Valve
- Low profile body
- Large drain outlet
- Large actuator plate
- Easy to clean
- NSF Certified
