Instructions

Glam & Glow Nail Studio

Create **FAB** Nails with
this Auto Sensing UV Dryer

WARNING!

Only for use by children over 8 years old.

Not suitable for children under 36 months due to small parts that may represent a choking hazard. Adult supervision is recommended. Read the instructions before use, follow them and keep them for reference. Do not apply to the skin, or close to the eyes or mouth. Do not swallow or inhale the contents. In cases of eye contact, wash out the eye thoroughly with plenty of clean water. If irritation or redness persists seek medical advice. Use contents within 6 months of opening the individual containers. Clean any spills with kitchen paper and clean water. Dispose of any surplus materials in the household waste.

Advice for supervising adults

This toy is for use only for children over the age of 8 years. Read and follow these instructions, the safety rules and the first aid information and keep them for reference. Incorrect use of chemicals can cause injury and damage to health. Only carry out those activities which are listed in the instructions. Because children's abilities vary so much, even within age groups, supervising adults should exercise discretion as to which activities are suitable and safe for them. The instructions should enable supervisors to assess any activity to establish its suitability for a particular child. The supervising adult should discuss the warnings, safety information and the possible hazards with the child or children before commencing the activities. The area surrounding the activity should be kept clear of any obstructions and away from the storage of food. It should be well lit and ventilated and close to a water supply. A solid table should be provided. The working area should be cleaned immediately after carrying out the activity.

Ingredients:

Neon Nail Polishes: Aqua; Ethylene/Vinyl Acetate Copolymer; Polyethylene Terephthalate; Trimethyl Pentanyl Diisobutyrate; Phenoxyethanol; Sodium Hydroxide;
May contain +/- CI 15985; CI 19140; CI 47005; CI 45410; CI 77742; CI 15850.

Glow in the Dark Nail Polish: Aqua; Styrene/Acrylates Copolymer/ Polyurethane; Zinc Sulphide; Stearalkanium Bentonite; Propylene Glycol; Phenoxyethanol.

Authorised Representative and Responsible Person in the EU (for the purposes of Toy and Cosmetic Safety Directives): Delphic HSE (Europe) B.V., The Base B, Evert van de Beekstraat 104, Schiphol, 118CN, Netherlands.

3 x 1.5v AAA batteries are required. Do not use rechargeable batteries. Never use different batteries to those recommended. Never mix old and new batteries, or different types of battery. Do not attempt to recharge non-rechargeable batteries. Remove and carefully dispose of exhausted batteries (recycle if possible). Batteries must be inserted with the correct polarity. The spring in the battery compartment corresponds to the negative (-) end of the batteries. Do not short circuit the supply terminals.

Mains Electricity:

Never connect to mains electricity. Children should be instructed about the dangers of mains electricity.

Recycling: Please recycle used batteries and electrical products using the facilities provided by your local authorities.

Contents

1 x Nail Dryer & UV Light Studio

1 x Workstation

3 x 7ml Solvent-Free Neon Nail Polishes (Aqua, Coral, Lime)

1 x 7ml Glow in the Dark Nail Polish

2 x Sheets of Glow in the Dark Nail Stickers

1 x Heart-Shaped Emery Board

Instructions

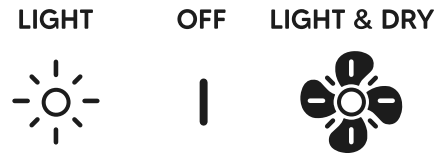

Glam & Glow Nail Studio

Salon Set Up

To get started, turn the unit over and unscrew the battery compartment. Insert the batteries with the negative (-) end of each battery (the flat end) against the spring, then replace the lid and tighten the retaining screw. Always make sure the switch is in the off position (middle) when handling the batteries.

The switch settings are:

Place the bottles, emery board and stickers in place in the workstation.

4

Now you are ready for your manicure!

Preparation

Wash your hands and nails well, making sure to remove any dirt under your nails using soap, a nail brush and warm water.

Trim your nails with a finger-nail cutter if they are too long, and file them gently using the nail file supplied to remove any sharp edges. Only file the tip of the nail, not the top surface, as filing the top surface will weaken the nail.

After filing your nails, always wash and thoroughly dry your hands to make sure that nail dust cannot spoil your nail polish.

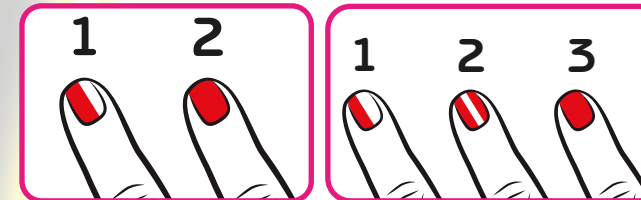

Top Tip:
Use the workstation to protect any surfaces from spilt nail polish!

Painting Your Nails - Base Coat

Always shake the nail polish before use to ensure that it's evenly mixed.

For best results you should paint your nails with smooth, continuous strokes of the brush, starting at the base of the nail (the cuticle) and painting towards the tip of the nail in a single stroke, using the brush supplied inside the lid of each nail polish. After dipping the brush in the nail polish, wipe the brush on the inside of the bottle neck to remove the excess polish and form the bristles of the brush into a good shape.

Depending on the size, paint your nail either in two strokes or three, as shown:

It is better to apply several thin coats of nail polish, rather than one thick coat, because this will produce a more even application. Set the salon to light and dry (far right setting) and gently place your nails under the lamp and dryer for 30 seconds.

Once dry to touch, apply the next coat (if it's still slightly wet, put your hand under the dryer for a bit longer).

If you make a mistake, wait for the nail polish to dry, peel it off the nail (or wash it off the skin with soap and warm water), dry the nail and start again.

5

Glow in the Dark Stickers

Carefully peel the sticker from the backing sheet by folding the sheet and apply to the nail. You may need to use some tweezers if you find this too fiddly!

To make the stickers glow in the dark, charge them up by placing your hand under the lamp for 30 seconds, pull away and see your fingers glow!

Once your design is complete, paint over with the transparent Glow in the Dark polish, which also charges and glows like the stickers.

Top Tip:
When your nails are under the lamp, look out for the neon polish to see a super charged glow!

Removing the Nail Polish

Once the nail varnish is dry, it can be peeled off your nail in a single sheet. Any excess that is stuck to the skin can be removed using soap and warm water.

**Paint On
Peel Off**

Mobile Phone Holder

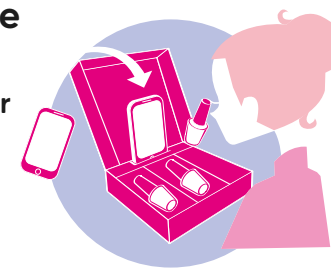

Included in your FabLab kit is a mobile phone holder, which lets you easily view our cool "how-to" videos packed with exciting content to discover new techniques and styles.

Simply place your phone into the holder and go to our channel at [youtube.com/fablabuk](https://www.youtube.com/fablabuk).
