MXAT04 and MXAT05 Assembly Diagram

- 1. The MXAT04 and MXAT05 are designed for *substantial* mounting brackets or surfaces up to 3/4" thick.
- 2. The MXAT04 and MXAT05 are designed to be installed in a 1/2" hole.
- 3. Part B, 3/8" spacer, is optional for mounting brackets or surfaces up to 3/8" thick. Part B, 3/8" spacer, should be removed for brackets or surfaces more than 3/8" thick.
- 4. Remove the FME to PL259 adapter on the end of the coaxial cable so the washers and hex nut can be slid off the coaxial cable. Also remove the 3/8" spacer, Part B, if not being used.
- 5. Route the coaxial cable from the topside through the mounting hole in the bracket or surface, Part C.
- 6. Slide the flat washer, lock washer and hex nut, Parts D, E and F, back on the coaxial cable in the order shown.
- 7. Hold the antenna assembly in position while tightening the hex nut, Part F. Maximum torque 35 lb-ft.
- 8. Finish routing the coaxial cable through the vehicle to the radio, before reinstalling the FME to PL259 adapter.
