

Jardan Robbi Mirror

Designed in-house by Jordan, the Robbi Floor Mirror is sculpted in clay, then hand-cast in resin to create a strong, enduring frame. Finished in painted plaster, its soft mineral surface feels sculptural and refined. Repeating ridges and hand-carved grooves echo architectural fluting, creating depth as light moves across the form. White gloves are included to support careful handling and care.

Mirrors Sizes

Please note that measurements may vary slightly due to the handmade nature of this item.

Robbi Shelf Mirror | White
1000H x 630W mm | Approximately 11.05kg
39H x 25W inches

Hanging Information | 2 intergrated hooks (D-rings)
2 hooks 56cm apart from centre, 90cm from base

Robbi Large Mirror | White
1300H x 900W mm | Approximately 13.75kg
51H x 35W inches

Hanging Information | 4 intergrated hooks (D-rings)
Vertical - 2 hooks 59cm apart from centre, 105cm from base
Horizontal - 2 hooks 105cm apart from centre, 69cm from base

Robbi Large Mirror | Juniper
1300H x 900W mm | Approximately 13.75kg
51H x 35W inches

Hanging Information | 4 intergrated hooks (D-rings)
Vertical - 2 hooks 59cm apart from centre, 105cm from base
Horizontal - 2 hooks 105cm apart from centre, 69cm from base

Robbi Floor Mirror | White
1800H x 900W mm | Approximately 18.8KG
71H x 35W inches

Hanging Information | 4 intergrated hooks (D-rings)
Vertical - 2 hooks 59cm apart from centre
Horizontal - 2 hooks 160cm apart from centre

Specifications

Materials

Plaster composite, with decorative finish and mirror glass. All the mirrors have been treated with a waterproof finish, meaning they are sealed and suitable for wet areas - such as a bathroom or kitchen space, where there is moisture in the air.

Warning

- Do not strike the glass with hard or pointed items.
- Do not use wire between the two fixing brackets on the frame - only hang by screwing a permanent screw into a secure wall.
- Check the strength of the wall, which the mirror is to be positioned onto special rawlplugs / screws maybe required if fitting onto a partition wall.

Jardan Hattie Mirror

Designed in-house by Jordan, the Hattie Oval Mirror is sculpted in clay before being hand-cast in resin to create a strong frame. Finished in painted plaster, its mineral surface feels sculptural and refined. Raised circular relief detailing sits within a stepped border, echoing architectural layering. The elongated oval silhouette introduces gentle curves while maintaining presence. White gloves are included for careful handling and care.

Hanging Details

Robbi Shelf Mirror & Hattie Oval Mirror

Features two integrated hooks (D-rings).
Mirrors can be hung vertically or horizontally.

Robbi Large & Robbi Floor Mirror

Features four integrated hooks (D-rings).
Mirrors can be hung vertically or horizontally.

Care

Cleaning

Dust with a soft clean microfibre cloth.
If marked, softly dab with a baby wipe or soft clean damp cloth.

Please note, Jordan Mirrors are handmade with care. The raw and organic properties of plaster present individual characteristics to every mirror. As each mirror is handmade, air bubbles and hairline cracks (whilst minimal), are part of the plaster's patina.

Hanging Directions

This installation guide will help to simply and safely install the Jordan Mirror. Jordan carries out a test assembly prior to delivery, but please ensure that all necessary components are present and use this handbook as a reference throughout the installation process.

Note

All fixing techniques rely for their security on the strength of the wall and screws/special fittings. Seek professional advice to guide you as to where the mirror can be safely installed and which wall fittings/screws are appropriate.

Prior to Hanging

- We recommend that a professional who has experience in art or mirrors should hang these mirrors.
- Mirrors are heavy objects and safety is dependent on the construction & strength of the wall to which it is attached.
- Prior to drilling ensure to check for any piping or any electrical cables. As mounting surfaces vary ensure that adequate fixings are used.
- We would recommend that your professional follows the installation guide to hang your mirror.
- One person is ample for hanging the small and medium mirrors, we recommended two people to install the large size mirrors.

Installation Guide

1. Hold the mirror against the wall in the desired position. Mark on the wall where one of the fixing needs to be. The wall surface should have a flat, even finish.
2. Drill a hole and insert an appropriate raw plug. Insert a screw and tighten, leaving the screw head exposed by about 6mm.
3. Mark on the wall where the other fixing needs to be placed, checking that it's the same distance apart as the two-fixings attached to the mirror. Make sure that the holes are in straight horizontal and level position.
4. Lift the mirror into position ensuring that the fixing clips attached to the frame are firmly hooked over the screw heads.
5. Check the mirror periodically to see that no fitting has loosened and needs attention.
