ST-III C Transmitter (For Canon) Firmware Instructions

1. Please update the firmware with PIXAPRO firmware update software G1. G1 can be downloaded from the essentialphoto website.

2. To check your current firmware version, switch the ST-III Trigger off, then press and hold the "MODE" button whilst switching the receiver on, and the firmware update version (e.g. Version 10 will read U-10) will be displayed on the LCD panel.

Version	Update Comment	Release Date
V27	1. To add the support of Canon EOS 200DII (Rebel SL3/Kiss X10) 2. To add the support of Canon EOS RP camera 3. To resolve the compatibility problems with Canon EOS R camera	18/06/2019
V26	1. To add support for Canon EOS 1500D (2000D, Rebel T7) 2. To add support for Canon EOS 3000D (4000D) 3. To resolve EOS R's Auto-ISO issue	04/05/2019
V25	1. To add TTL support for EOS R camera. 2. To add support for EOS M50 camera. 3. To strengthen the wireless transmitting signal and decrease the likelyhood of misfiring in the event of interference from external 2.4G wireless signals.	07/01/19
V24.1	1. To add TTL Mode support for Canon 5DS R camera.	17/07/2018
V24	1. To add the Fn-10 C.Fn custom setting so that the customer can set RF ID value.	10/01/2018
V23	1. To add support for Canon EOS 77D/800D/6D Mark II cameras	31/10/17
V22	1. To solve the group values' dislocation problem in M mode when the transmitter is controlled by the camera. 2. The flash times in Multi mode are set by users instead of being automatically restricted by the camera shutter settings.	12/09/09
V21	1. To add C.Fn custom settings. The transmitter's parameters that set by Pixapro APP are not changed. And the transmitter is only for triggering.	19/08/2017

Note: For more information, please download the latest version of the instruction manual from: www.essentialphoto.co.uk/firmware/

Version	Update Comment	Release Date
V20.1	1. To solve the unstable output problem of 5D4 and 650D cameras in the TTL mode. 2. To solve the problem that M3/M5/M6 can only use GR mode. 3. To solve the problems which occurred on the old camera models.	
V20	4. To add the support of Canon EOS M3/M5/M6 camera 5. To add the custom settings of forcibly sending group setting	26/06/2017
V19	1. To add the support of Canon EOS 5D Mark IV camera 2. To add the support of Canon EOS 80D camera	01/12/2016
V18	1. To support the common effects of camera and transmitter's FEC function. And FEB can be set on the camera.	18/07/2016
V17	1. The status of modeling lamp will not be sent when pressing the Test button.	28/06/2016
V16	1. To add the support of the new LCD panel.	20/06/2016
V15	1. To add the triggering operation at close range: Press the TEST Button to power the transmitter on, holding on until the STATUS indicator lamp blinks for 2 times. Now the wireless remote distance is from 0 to 30 meters. 2. 2. To add the support of 1DX Mark II camera	07/06/2016
V14	1. To solve the problem that the TEST Button cannot trigger PRO AC 2.4GHz receiver.	07/06/2016
V13	1. The former C.Fn setting values are changed to defined values. 2. To solve the communicate problem between transmitter and camera flash. 3. To add the beeper control in C.Fn functions (set C.Fn-07 to on). To see the concrete C.Fn functions, please refer to ST-III C Custom Function Settings. Xlsx.	26/03/2016

Note: For more information, please download the latest version of the instruction manual from: www.essentialphoto.co.uk/firmware/

Version	Update Comment	Release Date
V12	1. To support Canon EOS 7D Mark II camera. 2. Double-click the <CH> Button to turn on/off the modeling lamp of CITI600. 3. To add the simplified operation methods. 4. The power output of M/Multi is the same as the receive end.	18/03/2016
V11	1. To solve the problem that the output of Hybrid360 cannot be set by PRO AC 2.4GHz or ST-I 2.4GHz.	30/01/2016
V10	1. To set the minimum power output to 1/256 in the M/Multi mode (Set C.Fn-05 to on).	19/12/2015
V09	1. To support the second curtain function (Set C.Fn-04 to on, and the range of shutter should be at 30s to 1/30s).	12/12/2015
V08	1. In order to improve anti-interference ability, the frequency of CH9/CH 12/CH15/CH18/CH21/CH24/CH27/CH30 has been adjusted. As these 8 channels are not compatible with the old version, please update the relevant product.	26/11/2015
V06	1. To solve the problem that some Canon 5D3 cameras do not fire flashes under GR mode. 2. The updated flash trigger can support Canon 760D camera.	06/11/2015
V05	1. 1. To solve the compatible problem of flash trigger and Canon 1DX camera. 2. 2. Add Multi (stroboscopic function).	27/10/2015
