

ST-III O Transmitter (For Olympus & Panasonic) Firmware Instructions

1. Please update the firmware with PIXAPRO firmware update software G2. G2 can be downloaded from the [essentialphoto](http://essentialphoto.co.uk) website.

2. To check your current firmware version, switch the ST-III Trigger off, then press and hold the "MODE" button whilst switching the receiver on, and the firmware update version (e.g. Version 2.0 will read U-2.0) will be displayed on the LCD panel.

Version	Update Comment	Release Date
V06	1. To resolve the discontinuous triggering problem in continuous shooting when using Panasonic cameras e.g. S1R	22/10/2019
V05	2. To add the Fn-10 C.Fn custom setting so that the customer can set RF ID value.	10/01/2018
V04	3. 1. To solve the problem that CITI 600 Manual cannot be correctly triggered when all groups are set to M mode.	18/12/2017
V03	4. To add C.Fn custom settings. The transmitter's parameters that set by PIXAPRO APP are not changed. And the transmitter is only for triggering.	19/08/2017
V02	1. Original Firmware Version	10/07/2017

Note: For more information, please download the latest version of the instruction manual from:
