ST-III N Receiver (For Nikon) Firmware Instructions

1. Please update the firmware with PIXAPRO firmware update software G1. G1 can be downloaded from the essentialphoto website.

2. To check your current firmware version, switch the ST-III Trigger off, then press and hold the "GR" button whilst switching the receiver on, and the firmware update version (e.g. Version 10 will read 10U) will be displayed on the LCD panel.

Version	Update Comment	Release Date
V21	1. The customer can set RF ID. Operation: press the CH and GR button simultaneously and power it on to enter the RF ID setting interface. Short or long press the CH button to add the ID value while short or long press the GR button to decrease. Power off the flash trigger after 5s, and ID value can be set and saved. Then, power it on, and the ID value will affect RF reception.	10/01/2018
