

This web camera use Mstar main chip which will provide a stable system , with the starlight sensor it can show HD image in weak brightness conditions. 1080P HD resolution, support YUYV 、 NV12 、 MJPEG 、 H.264 、 H.265 video format, plug the USB and play Automatic without driver, its easy to install, simple to use.

#### **Product feature:**

**HD video :** High quality 1080P video effects. Can catch every details clear and true colors for video calls and video recordings.

**Audio :** build-in MIC, Through the chip noise reduction function, can capture the human voice clear, reduce the noise around the environment.

**USB connection :** No driver,just plug to the PC/TV then it will play Automatic

**Support System:** Windows/Mac OS /Android/Linux system

**Application :** Videochat, video conference, online education, video broadcast, smart TV ,etc

#### **Technical specifications:**

**Products name:** USB Web camera

**Model number:** X1

**Main chip:** Sigmastar

**Imaging sensor :** Starlight sensor

**Max Resolution:** 1080P

**Fps:**30fps **Support:** UVC/UAC

**Video format:** YUYV、 NV12、 MJPEG、 H.264、 H.265

**Video output:** USB video streaming

**Audio:** build-in MIC

**Power:** DC5V/160mA±6mA

**Working temperature :**-30°C-85°C

**Size:** 55mm\*19mm\*1.6mm

#### **System requirement:**

**Support:** Windows 7 、 Windows 8 、 Windows 10 Mac OS  
(May have to search for camera app in windows 10)
